Tuvalatin Valley

Improved All Red Delicious

Improved All Red
Delicious

NURSERIES

Over fifty-two years of continuous business operation. Growers of the finest fruit and nut trees. Three hundred acres of bearing orchards is your guarantee of True-to-Name Stock.

Tualatin Valley Nurseries Trees are hard to equal

A View of Apricot Trees. Trees Were Still Growing When Photo Was Taken. You Can't Go Wrong on T.V.N. Apricot Trees.

GUARANTEED TREES PLANT WITH CONFIDENCE

We will replace with new stock any trees that prove to be poor stock or are not satisfactory on delivery. Be sure and let us know within 5 days, as we want our customers to plant only the best. Your satisfaction is ours also. What better guarantee could you get? We want you as a satisfied customer. Our trees are true to name. We are Fruit Growers, that is why we can grow better and reliable trees, as our buds and grafts are taken from the best and most healthy and thriftest bearing trees with most uniform fruit. Give our nurseries a trial. You won't make a mistake.

We exercise the greatest care to keep our varieties pure and true to name and hold ourselves in readiness at all times to replace, on proper proof, all stocks that may prove otherwise or refund the amount paid. But it is mutually agreed by the purchaser and ourselves that we shall not at any time be liable for any amount greater than the original price; also, it is optional whether we replace or refund the money.

LOCATION: Our Nurseries are located at Sherwood, in the very fertile Tualatin and Willamette valleys. The reason we grow trees in different locations is one variety does so much better, so we have gone to greater expense and grow Peaches, Prunes and Apricots in one locality while Pears, Apples, etc., are grown in another; and the balance of other varieties, small Fruits, Shade Trees, etc., still in another locality. We are quite sure we have one of the best systems of growing trees in the Northwest.

We invite you to our Nurseries. Our office and packing shed is located near Sherwood, 17 miles west of Portland on Newberg, McMinnville highway 99-W. out of Portland.

HISTORY OF OUR FRUIT GROWING AND NURSERIES: We are giving a small outline of how we started growing nursery stock. We have almost 300 acres of bearing orchards. There is no nursery in the whole Pacific Northwest from the California line north to the Canadian line and east to Rocky Mountains that has as large a bearing orchard as we have and the large variety of different Fruit and Nuts and the nurseries are in three different counties in the State of Oregon. Our soil is the richest there is.

THE REASON WE STARTED GROWING TREES: Fifty years ago we started buying trees from other nurseries. We kept this up for several years, many times we got what we did not want, so for this reason we started to grow trees for our own planting as we kept increasing our acreage every year. We had such good success and grew so much better and more reliable trees than we could buy from other nurseries and we had so many comments on our fine trees from neighbors who wanted our trees as they were more reliable, so we grew more each year to meet our local demand, until now we have one of the largest in the Northwest.

We grow practically every variety of Fruit and Nuts that will grow in this northern country. Fruit and Nut growing is the greatest business on earth. There will be twice the Fruit consumed in the next ten years. Now is the time to plant. Be sure to plant our Trees for 100% satisfaction. We know our Trees. We are Fruit Growers.

QUALITY is our motto.

WRITE US BEFORE BUYING ELSEWHERE. We will save you money.
Please write us for any other information you might desire.

READ CAREFULLY

No Charge for Boxing and Packing

(We have always regarded this as a nuisance charge)

Send all mail to Tualatin Valley Nurseries, Route 3, Box 310, Sherwood, Oregon. In sending your order, be sure to give us shipping instructions, including your nearest express office and freight office. Also date you want us to ship.

We can take care of large or small orders.

Guarantee of genuineness, the same as universally given by leading nurseries, namely: That while we use the greatest care to insure all our stock to be absolutely true to name, it is mutually agreed and understood by the purchaser and ourselves that we are not to be held responsible for more than was originally paid to us for the actual number of trees found to be untrue to name. In addition will add that every detail in growing, budding, digging, grading and packing is under our personal attention and supervision, insuring as far as possible that the stock will be satisfactory on arrival and afterwards when it comes into bearing.

Showing Manner of Preparing Packages for Shipment. Bundles are First Burlapped, then Completely Wrapped with Heavy, Tough Paper, Making the Package Practically Frostproof.

If in any instance stock is found to be unsatisfactory on arrival from causes over which we have control, please notify us within 5 days from date of its arrival and we will, under proper proof replace with satisfactory stock or return amount paid us for the stock in question, however, it is distinctly understood and agreed that we are not to be held responsible for damage occurring to stock after we have delivered same to the transportation companies, for the care of same is then beyond our control; but we will do all in our power to guard against and to prevent any injury occurring whatever.

CAUTION — Be careful in unpacking to note everything, and either plant or cover up with moist soil at once. Moisten the roots and do not allow them to become dry.

NEW VARIETIES OF GREAT MERIT

CORVALLIS (NEW PEACH)

This new peach comes to us from D. M. Johns of Corvallis, Mr. Johns stating that a Doctor Alexander planted the seedling sixty-five years ago at Corvallis, therefore, we consider "Corvallis" to be an appropriate name for it. The fruit is very large and globular, a yellow freestone, ripening just after J. H. Hale. We feel that the great merit of this peach is its large size, beautiful coloring and the fact that it colors up brilliantly while still firm and solid, which should make it a very valuable shipping variety, for it will stand a lot of handling without being bruised or discolored. (Patent applied for.)

GOLDEN JUBILEE (A) A development of the New Jersey Experimental Station. Planted and producing in every peach producing section of the United States and Canada and stands without an equal as an early, yellow, freestone peach of exceptional quality. The Golden Jubilee is a second generation seedling of the Elberta crossed with the Greening. The tree is unusually hardy. The buds resist low Winter temperatures better than Elberta and open later than Elberta insures a regular crop. The blossoms are self-fertile. The peach is medium to large size and firm. From observation we find that the peach develops better if a well balanced fertilizer is used and in the lighter sandy soils of the Southern Peach producing areas where Jubilee is inclined to set too heavy a crop, better fruit is obtained by thinning the fruit on the tree. As the tree grows older the fruit becomes firmer and develops more naturally. NO GENERAL PLANTING OF PEACHES IS COMPLETE WITHOUT A LIBERAL AMOUNT OF GOLDEN JUBILEE TREES.

[MP.] ALL RED DELICIOUS

New long keeping. We have an exceptionally fine strain of the All Red Delicious in a long keeping strain. We have found that they will keep at least a month or more longer than other strains of the All Red Delicious. For the large planter we would advise planting some of these as they have everything to gain and nothing to lose as the quality and production is equal to any strain of Delicious Apples ever put on the market

IMPROVED RED WINESAP

We have an exceptionally fine strain of Winesap which produces nearly 100% color, size and quality. It is just as good as the standard old Winesap but you will get more extra fancy grades. It would be advisable for fruit growers to plant a quantity of these as they are a superior apple.

IMPROVED ALL RED JONATHAN This is another Jonathan than Apple only you receive nearly 100% color which means more extra fancy grades. This tree is just as prolific a bearer as the standard old Jonathan but is more profitable for the large fruit growers. We advise planting a quantity of these.

RED BARTLETT PEAR

This is a new Improved Bartlett Pear. It has a better color and is a heavy producer. Canneries claim it has more sugar contents. You should plant some of these for greater profits. These new Red Bartletts will in time replace the old type of Bartlett. Prices are higher per tree on these as we have to pay royalties. These prices will be found in the Pear Section of this catalog.

BLACK ROME BEAUTY This is a Rome Beauty type apple sometimes called Cherry Red Rome Beauty. It has a very dark red color. The keeping quality is just as good or better as the standard Rome or Red Rome. We only have a limited supply of this variety. No extra charge.

SOUTHWICK (NEW APRICOT)

The original tree of this variety, which came from a seed planted in 1852. The tree is one of our best growers of all the varieties of apricot in our nursery. The fruit is round, very large, with true apricot color, slightly red on the sunny side. We hope and trust this variety will prove to be an iron-clad long lived variety the same as the parent tree, which of course time alone can prove. Patent applied for.

Do Not Include Sales Tax as Oregon Has None.

PLANTING INSTRUCTIONS

PLANTING SEASON—Stock should not be planted until dormant in the fall nor after growth starts in the spring. Under ordinary weather conditions therefore our digging and shipping season begins in late October and continues until early May, the winters generally being sufficiently mild to permit safe handling of nursery stock, with but few short interruptions. Early fall planting is preferable as a rule as roots form all winter and stock is ready to grow as soon as warm weather begins.

It is advisable to order early, as a better selection and more complete assortment can be had. Orders placed early are generally planted early. Orders can be placed early with instructions to ship at a given time, when you are ready to plant.

A beautiful block of Apple Trees. We have thousands of them, in all sizes. We can furnish them as large as you like.

Care of Trees On Arrival

In case you do not immediately plant the trees, it will be well to heal them in, namely, to bury the roots in the ground to keep them fresh and from being frozen.

In doing this dig a trench long enough and wide enough to hold the trees you have; cut the bottom string on the bunches, place them in the trench, spreading the trees so as to have the dirt worked in, leaving no exposed places. The tree should NOT be laid down at an angle of 45 degrees, but should be stood straight up, for a lot of nursery stock is injured by being healed-in in a reclining position, for many times the dirt from the trench is left under the trees which are close to the ground. This dirt is still warm, or warm enough to make the sap in the trees active and if there should be frosty weather in a short time after the trees have been healed-in in a reclining position the sap will be frozen, resulting in soured sap and a lasting injury to the tree and you will also be writing in to the nursery that the stock was diseased, etc., when the cause was really wrong methods of healing-in. We do not mean to infer that to heal-in in a reclining position will always result in damage, but do mean to infer that you are flirting with disaster, if it is done. Be sure and bury the roots.

In Planting: Do not plant too deep, the same depth as they were originally, you can tell this by the ground line on the trees, where they grew in the nursery. This may be determined by the color of the bark above the roots, showing where the ground line came. Have the holes wide enough so as to hold the roots without crowding. Tramp well after a couple of inches of dirt have been put in, etc., until the hole is filled up, leaving the top dirt without being tramped. In late spring planting, if a bucket of water could be thrown in when the hole is half filled with dirt it would be very beneficial.

Do not plant or expose the roots when it is freezing. That is, do not start planting frosty mornings or until it starts to thaw, and do not leave the trees you have not planted during the day outside and take a chance on it freezing until you start planting again the next morning. For if the exposed roots are caught in a frost, the chances are that they will not grow and you might think you had been swindled by your nurseryman, while it would only be through your own negligence in not taking care of the trees during planting operations.

Winter Injury

Weather conditions have killed and injured more fruit trees than all other causes combined. We consider the most dangerous season of the year to be in very early spring when we have bright, warm sunny days, followed by frosty nights, the warm rays of the sun starts the sap on the south sides of the trees. These clear days of February and early March are followed by frosty nights, the frost clinging to the bark chills the freshly risen sap, which soon becomes sour, often bursting the bark on the south sides of the trees and causing a gum-like substance to issue forth. This is soured sap, caused by thawing and freezing and may be prevented to some extent by shading the south sides of the young trees with a board or shake. These should be 5 inches wide, 3 1-2 feet high, 1-2 to 1 inch thick, sharpened at one end and driven into the ground about 6 inches from the tree, always on the south side so as to keep the sun rays from starting the sap prematurely. These protectors should be used for the first three years, after which the bark on the trees will have become thicker and will better withstand the sudden changes of temperature. The protectors may be removed during the summer months, or after danger of frosts is over. Sweet Cherry, Apricots and Peaches are the most easily affected. However, no harm will be done if the protectors are used on all young fruit trees.

The Oregon Agricultural College advises a liberal coat of whitewash as a protection for orchard trees through the winter. This may be applied on the larger limbs as well as the body, but in young trees would suggest that you also use the board or shakes in order to keep the sun off of the south sides, for we are certain that the premature action of the sap, caused by the sun is the start of the damage caused by the freezing that follows. By using both the whitewash and the boards, one would have double protection.

A TRUE PHOTO OF ELY IMPROVED ELBERTA PEACH. It is almost red in color. One of the finest Peaches grown. Order before we are sold out. Large and thick as grapes. The Imp. Ely Elberta is one of the most profitable trees for home canning. Plant a few acres of these and make yourself a good income. The canneries will also pay a good price.

APPLES

The apple is the first in importance of all fruits. It will thrive on nearly any well drained soil. Its period of ripening, unlike other fruits, extends nearly through the whole season. By making careful selection, a constant succession can be obtained. For family use there is no fruit that is more indispensable. No fruit is so healthful and many physicians say that if a person would eat an apple a day they could dispense with doctor bills. Besides this, and just as important, is the fact that the average price on the market is steadily increasing and the immense demand for home consumption, foreign shipping, canning and evaporating assures high prices. The apple if given the same care and attention as other farm crops, will yield greater returns per acre. The following list we consider to be the best for general planting:

PRICES ON APPLES AND CRABAPPLES

| | each | 10 to 25 | 25 to 100 | 100 to 300 | 300 to 1000 |
|------------------------|------|----------|-----------|------------|-------------|
| 2 to 3 feet | .75 | .60 ea. | .55 ea. | .50 ea. | .45 ea. |
| 3 to 4 feet | 1.00 | .85 ea. | .75 ea. | .70 ea. | .65 ea. |
| 4 to 6 feet Select | 1.25 | 1.00 ea. | .85 ea. | .80 ea. | .75 ea. |
| 4 to 7 feet Ex. Select | 1.50 | 1.25 ea. | 1.00 ea. | .95 ea. | .85 ea. |

Large Lots, Write. We Meet Competition. Send Want List for Quotations.

Write for special price on extra large lots. We have many varieties of Improved Apples. Please write.

SUMMER

YELLOW TRANSPARENT

(Improved Strain) — Summer

Season, July. One of the most valuable early apples. Fruit medium smooth, transparent skin; clear white, becoming pale yellow when fully ripe; flesh white, tender, fine grained, of splendid quality. Tree is moderately vigorous and a good annual bearer. One of the few sorts that do well even on poor thin land.

RED ASTRACHAN Season, July. Tree upright spreading, vigorous growth; an early and abundant bearer. Fruit above medium, greenish-yellow, almost covered with mottled and striped crimson; flesh white; crisp, juicy; brisk acid; good.

RED GRAVENSTEIN A Gravenstein type apple, has a better color. A good quality.

RED BIRD The best Red Early Apple, gets ripe before Yellow Transparent, has good color. Does not keep very long. It is a good seller.

GRAVENSTEIN Large beautifully dashed with deep red and orange; tender and crisp, with a highly aromatic flavor; tree very vigorous. August. There is no orchard complete without one.

RED JUNE Size medium, oblong, with brilliant red skin, flesh white, tender, juicy, sub-acid, with a slightly agreeable flavor; quite early and continues to ripen for four weeks, and will keep long after ripe for a summer apple; profitable for market. The tree is fine, erect grower, very hardy, bears young and abundantly. A valuable early apple.

*Be Assured of the Best Quality
Buy Only from One of the West's
Oldest and Largest Nurseries*

FAMEUSE (SNOW APPLE)

Season, October and November. An old and well known variety. Tree a moderate grower. Very hardy and not very well adapted for growing in the South. Productive. Fruit medium in size; color pale greenish-yellow, mixed with stripes of red with splashes of same on shady side; flesh white, tender and juicy, slightly perfumed; flavor sub-acid extra good.

KING (KING OF TOMPKINS COUNTY)

Flavor like the Baldwin. One of our best fall apples. Very saleable. November to December. Very large size, red and yellow color.

WINTER

NORTHERN SPY

Large, roundish-conical, often flattened, slightly ribbed; handsomely striped with red; flavor rich, aromatic, mild sub-acid, fine. Keeps through winter and late into spring. To afford fine fruit, tree must receive good cultivation and attention. A market fruit of highest quality. November to January.

BALDWIN

Season, December to March. The great commercial late winter keeper of the Eastern states. Tree a vigorous open grower, upright in tendency and very productive where hardy. Comes slow into bearing, but produces abundantly when mature. Fruit large, rounded, deep red; flesh rich and juicy.

WINESAP

Medium size, dark red, juicy, mild. A favorite late winter apple and a leading commercial variety on all markets, as well as a very popular home variety. November to April.

ROME BEAUTY

Large, roundish, very slightly conical; mostly covered with bright red on pale yellow ground; flesh tender, not fine grained, juicy, of good quality. Ripens early in winter. The large size and beautiful appearance of this apple render it popular as an orchard variety. Attains highest perfection in medium soils. November to March.

BLACK ROME BEAUTY

Plant these for profit. Description on Page 4.

YELLOW BELLFLOWER

Large, oblong; skin yellow, with a beautiful tinge of red on the sunny side; flesh crisp, juicy with a delicious high flavor. October to January.

JONATHAN

This variety is probably better known to average consumers of dessert apples than any other variety. It is recognized on all markets of the country as one of the best among the few leaders of high quality eating apples. The fact that its qualities and flavor are also superior and outstanding when used for culinary purposes adds to its popularity. The fruit is medium size, red and beautiful. It bears young and abundantly. It is quite hardy. Season November to February.

IMPROVED ALL RED McINTOSH

A special bud selected strain of the famous McIntosh apple, coloring a solid red without a trace of stripe. Without question this is the finest type of the McIntosh that has come to our attention and will say that if you are not getting sufficient color on your present plantings of McIntosh you should make your new plantings of this Improved Type this year.

We Advise Tree
Protectors For All
Young Fruit Trees
Be Put On At Once

TREE PROTECTORS

We have a complete stock of tree protectors. It is very advisable that you use tree protectors for young filbert trees. As you will notice, the price is very inexpensive and will pay large dividends. They are also good wherever the trees are bothered with rabbits or other rodents as they will protect the trunk of the tree. They also will keep the young trees from being sun-burned

Prices:

10 lots, 5c each.

50 to 300 lots, 4c each.

300 lots or more, \$3.75 per hundred...

1000 lots, \$3.50 per hundred.

Tualatin Valley Nursery Trees Are Famous For Heavy Crops

WINTER BANANA Fine, vigorous grower, large healthy foliage; early bearer. Fruit medium to large, smooth and handsome, golden-yellow usually shaded with red blush; flesh fine grained, rich sub-acid, aromatic; highest quality. One of the best dessert-apples. A valuable market variety, but bruises easily and is not adapted to long distance shipping.

STAYMAN'S WINESAP Most profitable market variety. It has large size, bright red color, great productiveness and best quality to commend it. The tree is vigorous grower, is irregular and drooping in habit, and adapts itself readily to different soils and situations. Drought resisting. Season, November to February.

A Beautiful Block of those Famous Tualatin Valley Nurseries Apple Trees. Over 20,000 Trees.

ARKANSAS BLACK Large, round or slightly conical; regular, smooth, glossy yellow where not covered with deep crimson, almost black; flesh very yellow, firm, fine-grained, juicy; flavor sub-acid pleasant rich.

McINTOSH RED Season, December and January. A choice variety of the Fameuse type. Tree vigorous with spreading head; a good annual bearer. Fruit above medium to large highly perfumed; smooth polished yellow, almost covered with brilliant solid crimson, a beautiful fruit; flesh snow white, crisp, very tender, sprightly aromatic, sub-acid, very good quality.

SPITZENBURG, ESOPUS Truly delicious apple; fruit striped and splashed with red; flesh yellow, rather firm, with a delicious rich acid flavor. November to April.

NEW RED WINE DELICIOUS

This new type Delicious we have is one of the finest types of delicious growing in the Northwest. We have found that this strain will out-keep most any of the other types of delicious, but they run heavier too. All red color and keeping qualities are much better. The apple has the same prominent points as the old standard type of delicious. This is going to be one of the leading varieties growing in the Northwest. Quality is hard to equal. 10c extra per tree. Tualatin's Valley Nursery is the only nursery growing these for sale. Plant them for profit. Applying for Pat.

LADY APPLE This is an old-time apple. Small red check. Used for Christmas. Sometimes called Xmas apple.

RED ROME BEAUTY A sport of common Rome Beauty but much darker red and of better appearance. A good seller.

YELLOW DELICIOUS Beautiful yellow color. Heavy croppers which bear the second year. A good pollinizer. One of the best apples; acid free.

IMPROVED ALL RED JONATHAN Plant these for profit. Description on page 4.

IMPROVED RED WINESAP

This is a Winesap only much better color than the common Winesap, nearly 100% color, which means more extra fancy grades. Sizes will run as large as common Winesap. Full description on Page 4.

IMPROVED ALL RED DELICIOUS This apple originated from a sport of the common Red Delicious. Comes into bearing younger and matures a solid red. Fruit of superb size and quality. Outselling the common Red Delicious practically 50% in the fruit market of the world. We have a few thousand trees for this season. Complete description on Page 4.

YELLOW NEWTON A yellow winter apple, the best shipper. An extra good quality keeper, one of the best for shipping to Europe.

COMMON RED DELICIOUS

The regular oldtime Delicious apple, a very nice flavor. It's still a leading apple.

CORTLAND is an improved late McIntosh. The fruits of the two varieties are similar, but those of Cortland are more oblong, average larger, and are more uniform in size; they have more color and the red is lighter and brighter and the stripings and splashes are laid on differently; the taste of Cortland can hardly be distinguished from that of McIntosh; the flesh is firmer but just as juicy; the apples do not drop as readily and ship better.

CRAB APPLES

SAME PRICES AS APPLES — SEE PAGE 7 FOR PRICES

✓ **HYSLOP** Season, September to October. Tree vigorous where hardy; blights in some localities. Fruit medium; yellow groundied with heavy shadings of deep crimson and splashes of maroon with heavy blue bloom; flesh fine, firm yellow, astringent; bears abundantly in clusters, which makes tree exceedingly ornamental. Its high color always commands fancy market price for it. One of the most desirable sorts for culinary purposes.

✓ **TRANSCENDANT** Season, September. Medium to large; color brownish-yellow with blush of carmine;

flesh firm and crisp, yellowish, fine grained, very juicy, not subject to blight and is acid. Tree is a vigorous grower. Hardy, planted near other orchard trees.

✓ **RED SIBERIAN** About an inch in diam., grown in clusters; bears young and abundantly. August to September.

✓ **WHITNEY'S NO. 20** One of the largest crabs; glossy green splashed carmine, juicy pleasant; great bearer, excellent for cider. August.

PEACHES

REAL PROFITS IN TUALATIN VALLEY PEACH TREES

We have one of the largest assortments of peach trees in the northwest. All of our budding wood is selected from heavy bearing trees to insure our customers of extra quality. We have several large bearing peach orchards adjoining our nurseries. For this reason we are sure to be able to select genuine true to name stock which is often times hard to do where you do not have bearing trees to select from. Our J. H. Hale are of a heavy producing strain. The Elbertas are a heavy bearing tree, also the Imp. Early Elberta. We have an exceptionally fine bearing strain of them as well as of all of our other main varieties such as Early Crawford, Late Crawford, Muir, Golden Jubilee, Slappy, etc. You will profit greatly by selecting peach trees from our growings. Peaches will grow in most soils that are reasonably well drained.

| | each | 10 to 25 | 25 to 300 | 300 to 1000 |
|----------------------|------|----------|-----------|-------------|
| 18 to 24 inches | .75 | .55 ea. | .50 ea. | .45 ea. |
| 2 to 3 feet | .85 | .75 ea. | .60 ea. | .55 ea. |
| 3 to 4 feet | 1.00 | .85 ea. | .75 ea. | .70 ea. |
| 4 to 6 feet Selects | 1.25 | 1.00 ea. | .85 ea. | .80 ea. |
| 4 to 7 ft. Ex Select | 1.50 | 1.25 ea. | 1.00 ea. | |

Large Lots, Write. We Meet Competition. Send Want List for Quotations.

✓ **J. H. HALE** We have one of the finest strains of J. H. Hale grown, the buds have been selected from record-bearing true to name trees. We claim to have one of the finest strains of Hales in the Northwest, you are always sure of a crop. They produce very large fruit exceptionally well colored, flesh is very deep yellow. Also a very thrifty grower, a good canning peach, and shipper.

✓ **ELBERTA** Very large; skin golden yellow where exposed to sun, faintly striped with red. Flesh yellow, very fine grain, juicy, rich and sweet. Tree very prolific and presents a handsome appearance. Perfect freestone. Ripens in September.

✓ **SHOTZ LATE HALE** A very late Hale type peach, our own production. This peach has wonderful possibilities. Grows to large size and resembles the J. H. Hale, but is from two to three weeks later. A good peach for late trade.

✓ **RED HAVEN** This is a new variety. Better color than Hale Haven. Nice size. Ripens about same time as Hale Haven.

✓ **SLAPPY** Fruit yellow, good bearer, excellent flavor, fine grained, rich, hardy. Best medium early yellow peach. July.

✓ **CRAWFORDS LATE (Free)**

Large round-ish oval, yellow with broad red cheeks, flesh yellow with red at the pit; melting, vinous and very good. Late September.

✓ **CORVALLIS PEACH** A Tualatin Valley Nursery Production. Here is a new peach, our own strain. None better. This peach resembles the Hale family. More free of disease. Description on page 4.

✓ **IMPROVED EARLY ELBERTA**

This is an early Elberta type peach, usually ripens a few days before the regular Elb. Quality is improved. This is one of the finest home canning peaches grown. The canneries in the Willamette Valley are canning all that they possibly can get hold of and have been offering a good price the last couple of years. We advise this variety for a home canning peach. This variety is almost red in color, heavy producing. You will find photo of this in Catalogue. There is no peach a better shipper. Sometimes it will ripen even more than 10 days ahead of Elberta. This tree has a distinctive marking, above almost each bud there is an oblong scar.

Our Peach Trees Are Famous For Growth and Productiveness

ROCHESTER This variety was introduced during the last few years, resembles Early Crawford, but does not split at the pit as does the Crawford.

IMPROVED ROCHESTER This is a regular Rochester type peach only we have selected from a special tree which seems to be a slight improvement over the standard Rochester. Otherwise, flavor, etc., are the same. No extra charge.

MAYFLOWER Earliest peach known. Dark red all over, prolific bearer. Ripens last of May or the first of June.

CRAWFORD'S EARLY (FREE)

Large, roundish bright yellow with red cheek; flesh yellow, juicy and sweet; quality good. August and September.

IMPROVED LATE CRAWFORD

A superior strain of Late Crawford. Better flavor, can't be equaled for canning. Not a very good shipper.

IMPROVED CRAWFORD

SPECIAL An early Crawford variety. Ripens a few days earlier and not so many split pits.

TUSCAN CLING (TUSKENA):
YELLOW TUSCAN) Very large, yellow. The best early canning peach; takes the lead over all other peaches in prices. Middle of July.

HALE'S EARLY Medium, nearly round; skin mottled red, dark red cheek. Flesh white, juicy, melting, high flavored, free from stone. First of August.

SOUTH HAVEN A fine East. peach, ripens after Rochester. Introduced by South Haven Experiment Station.

HALE HAVEN The Hale Haven comes through — North, East, South and West. — We know of no peach of recent introduction that is proving so universally satisfactory as the Hale Haven. It is now an unchallenged leader of peaches to follow Jubilee, Vedette and being its nearest rivals. A product of the South Haven experiment station in Michigan. A definite improvement over the South Haven, being more resistant to low Winter temperatures. Freestone, tough skin, highly colored, adapted to large commercial plantings. Tree vigorous, fruit large globular shape as Hale. Resembles this variety. Two weeks earlier than Hale and Elberta. Extremely high quality, good shipper.

VEDETTE A seedling of Elberta of Canadian origin. Ripens about 3 weeks before Elberta or just before South Haven. The tree is productive and the fruit large, roundish oval, yellow fleshed and a freestone. We just have a few trees left of Vedette. We recommend it for trial.

A Basket of True to Name Peaches From Tualatin Valley Nursery True to Name Trees.

VETERAN A cross between Vaughan and Early Elberta; of Canadian origin. The fruit is large, round, yellow fleshed, freestone and superior to Elberta in quality. Ripens a few days after Valiant or about 2 weeks before Elberta. Our supply of these very limited. Yellow fleshed, these precede the Early Elberta and follow the Golden Jubilee.

IMPROVED MUIR We have a good imp. strain of Muir peach. Type and quality is the same as regular Muir but seems to be a little more of a prolific bearer.

NEW EXTRA EARLY ELBERTA This ripens in the Willamette Valley about July 15th to 25th. They are earlier then the Imp. Early Elberta. Are a good market peach for freezing and canning.

IMPROVED MUIR OR MALTA We have a good Imp. Strain of Muir Peach. Type and quality is the same as regular Muir but seems to be a little more of a prolific bearer.

TRIUMPH Earliest yellow flesh peach; ripens a few days later than Alexander, blooms later; sure and abundant bearer; strong vigorous grower; fruit good size; yellow, with red and crimson cheek.

SALWAY (FREE) Large, roundish, deep yellow with rich red cheeks; flesh yellow, firm and juicy and sugary. Trees are strong growers and bear plentiful crops.

PHILLIP'S CLING Large, yellow, flesh firm, clear yellow. Always commands the highest market price for canning. Late August.

FOR VARIETIES OF TREES NOT LISTED, PLEASE WRITE

→ KRUMMEL OCT.

Latest peach grown,
Good flavor, ripens
after Muir variety.

→ ORANGE CLING

One of the best Cling
peaches for canning.

This is an example of beautiful One-Year-Old Peach Trees, with a two-year root system. Our Trees are Superior.

→ GOLDEN JUBILEE Description on page 4. An early peach of great merit. This will be a money-making variety. We advise to plant a quantity.

→ VALIANT A seedling of Elberta of Canadian origin. A large yellow fleshed, high colored peach, ripening just after Vedette. Very hardy and productive. Same season as South Haven.

Insist on Our Bartlett Pear Trees, our Trees are blight resistant. It will pay you to plant only Tualatin Valley Trees.

Satisfaction Plus — Guaranteed

With Every Mail We Receive Letters from Satisfied Customers Who Write Us Praising Our Service and The Quality of Our Stock, a Typical Letter Just Received is Reproduced Below:

DEAR SIRS:

Three years ago we ordered trees from several nurseries, including yours. My wife and I decided we should tell you about the trees we ordered from your nursery.

We had the largest and finest peaches — what color and flavor! from your trees. The other companies' peaches cannot compare with them. Your 'Hale Haven' trees were loaded with 3 to 3½ inch peaches - the most beautiful we have ever seen.

I've told a lot of people about your trees, because I couldn't believe there could be so much difference.

September 10, 1951, Fredonia, New York.

Thousands of Satisfied Customers from All Over the World have Written To Us

WE HAVE ONLY THE VERY BEST IN SHRUBBERY

APRICOTS

Plant our apricot trees if you want true to name and heavy production. Again we are insuring our customers to receive better profits. The finest trees we have ever grown.

WRITE FOR SPECIAL PRICES ON EXTRA LARGE LOTS

ROYAL Large, roundish-oval; pale orange with faintly tinged red cheek; flesh yellow, firm, sweet, high flavored, slightly sub-acid and good quality, ripens a week earlier than Moorpark; a good market variety.

TILTON We consider this variety one of the best commercial sorts. Flesh firm, sweet and juicy; tree hardy and thrifty grower.

BLENHEIM (SHIPLEY) Above medium; deep yellow; juicy and rich flesh. Practically the same as Royal. Any difference is in the fact that Blenheim is larger. In great demand both for canning and drying. Trees regular and heavy bearers. Middle of June.

WENATCHEE MOORPARK

The tree a more thrifty grower than the genuine Moor park. These are quite extensively planted in the irrigated districts and are a splendid commercial variety.

SOUTHWICK APRICOT Another new apricot. It tops them all. This apricot has proven out where others fail. A Tualatin Valley Nursery Production. Description on page 4.

PERFECTION GOLDBECK

Tree Exceptionally hardy, adapted to high and low altitudes, bears over a period of 4 to 6 weeks. Fruit has delicious flavor, large, ripens evenly, good shipper, and has commercial value.

CHINESE OR MORMON COT

Very hardy. Resembles the Tilton and ripens almost the same time or earlier.

MOORPARK A large, roundish apricot with an orange cheek. Good commercial variety.

ANDO COT This is a new strain apricot, coming from Siberia; very hardy and will stand the coldest climates. 10c extra, per tree.

NECTARINES

This fruit may be described as a smooth skinned peach. Thrives where peaches do and takes same cultivation and management. Is superior to the peach as a dryer and makes excellent preserves.

Prices same as peaches.

EARLY VIOLET Medium size, skin yellowish green, with a purple cheek; flesh melting, rich and highly flavored. July.

BOSTON Bright yellow, red cheek; flesh yellow. Late July and early August, the Boston is one of the best nectarines.

QUETTA NECTARINE Good variety for home use and market. Hardy, yellow meated.

NEW WHITE NECTARINE

Large white with blush. Ripens late July or early August.

STANWICK NECTARINE

This is a very fine nectarine which will do exceptionally well in most all districts in the Northwest, also will do well in Utah and California.

FRENCH IMPROVED Identical with the larger sizes, and the trees being of a French prune in every respect. Its superiority consists in the fruit running to more willowy habit than the general run of French prune trees.

SILVER Large and handsome, oval in shape, light yellow skin; flesh firm, rich and sweet, and adheres to the stone. Fruit shaped like a prune, with the qualities of a plum. A very heavy bearer.

EARLY ITALIAN This is a very fine, or DEMARIS ITALIAN large Italian Prune, ripening about 10 days earlier than regular standard Italian. A good prune for the fresh market. Also a good shipper.

SUGAR PRUNE A large, dark purple, very sweet prune. A good home fruit.

ITALIAN This is the regular standard Italian Prune which has been grown for many years. Medium, oval, tapering at both ends, blue in color, freestone. Best for drying or shipping to Eastern markets. This strain of Italian we have is hard to equal. We have about 100 acres of them in bearing of our own. All our young stock is heavy producing with extra large fruit.

DATE or COATES 1418

(Also known as Saratoga.) This is a sweet prune, nearly a large as Italian and so far has proven to be an annual and prolific bearer; has had a full crop in seasons when Italian prunes failed to set fruit. A good dryer, drying out heavier per bushel than the Italian.

Tualatin Valley Nurseries, Sherwood, Ore.

RED WINE DELICIOUS

The New Improved All-Red Delicious . . . It keeps longer, has better flavor, larger size, better shape, and is a heavy producer. Plant Apple Trees NOW . . .

Roses, Roses . . .

We wish to direct your especial attention to the Rose pages in this Catalogue. We've never had the opportunity of offering so wide selection . . . and at such low prices.

SEE PAGE 14 FOR OTHER VARIETIES
OF PRUNES

Originally it came from France. A very sweet prune; good for drying.

WEATHERSPOON ITALIAN

This is an Italian Prune of improved type. Large, heavy producer. A vigorous grower and one of the best shippers grown. Ripens about the same time as regular Italian; August.

✓ **HUNGARIAN PRUNE** This is a large size prune extra fine for eating. Good to sell fresh on the Fresh Fruit Market. Comes reasonably early for a heavy producer; August.

✓ **STANDARD PRUNE** Italian type prune resembling the regular Italian. Good for canning but not so good for shipping or drying; August and September.

✓ **REINE CLAUDE** Very fine canning, good market at canneries. Fine flavor and a prolific bearer. July.

FRENCH PETITE PRUNE

This is the regular old standard Petite Prune grown for many years in the Willamette Valley.

DELICIOUS T.V.N. PRUNES
No Finer Quality At Any Price

PLUMS

Plums are a fine early fruit. We have selected out of the many varieties the best producing strains for the northwest, the inland empire and the Pacific Coast. All of our plum trees are grown from heavy-bearing strains. All varieties we have here are extremely hardy and will do real well in the cold climates as well as in the warmer climate.

Notice — Prices on Plum Trees are the same as Prunes.

PRICES FOR THE FOLLOWING WILL BE FOUND ON PAGE 14

LATE SANTA ROSA PLUM

This plum has all the good qualities of Santa Rosa, plus its ability to remain on the tree for a long period. Ripens fully a month after Santa Rosa thus making it a splendid home and market plum.

✓ **SANTA ROSA** Regarded as one of the best of the Japanese type of plums. Very large; deep purplish crimson color, with pale blue bloom. Flesh yellow, streaked and shaded with crimson. As a shipping plum it has few equals. Ripens middle of June.

✓ **ABUNDANCE** Tree a strong grower. Fruit large; skin bright red cherry color; flesh yellow, tender and juicy. July and August.

✓ **YELLOW EGG** Showy market variety and good for canning. Large; oval; deep golden; juicy; rather acid. July to August.

✓ **BURBANK** Medium to large, orange-yellow, dotted and marbled with red; flesh meaty, yellow, sweet and good; valuable for canning and a good market plum. Mid-June. Hardy and most prolific of the Japan varieties.

✓ **DUARTE** Late July. Shipping. A blood red plum of late introduction. Fruit large and elongated; skin a dull red. Flesh firm, deep red, and good quality.

✓ **DAMSON** Deep purple fruits of delicious quality. One of the best for marketing as it stands handling well. Tree vigorous, hardy and resists disease in a remarkable fashion. Good for jelly only. August.

✓ **GIANT SATSUMA** A new variety. Good shipper. Ripens June or early July.

✓ **SHIRO** Originated by Luther Burbank. Fruit egg-shaped; medium size, smooth, bright yellow, thin bloom; flesh clings to the pit. Said to be more productive than the Burbank.

✓ **BEAUTY** Another late introduction, having been accorded a leading place by the growers of shipping plums. Tree a most remarkably vigorous, upright grower with large, healthy foliage. Fruit beautiful, oval, crimson with amber-crimson flesh. The largest of the early plums and ripening 10 days earlier than Santa Rosa, June.

✓ **PEACH PLUM** Very large; skin brownish-red, slightly coarse grained but juicy; freestone; very popular as a home and market variety.

REAL PROFITS IN TUALATIN VALLEY PEACH TREES

CLIMAX Very large; deep, dark red; flesh yellow, delicious flavor. Tree vigorous and very productive. Mid June.

SATSUMA Japanese variety; blood red flesh, small pit, pleasant flavor. Hardy. Ripens June, early July.

COE'S GOLDEN DROP Large and handsome; light yellow, firm, rich and sweet. September.

BRADSHAW Very large, dark violet red with good flavor. August.

WICKSON PLUM We advise to plant a tree or two for home use. Ripens early. July.

PRESIDENT PLUM A fine flavored plum. Medium large. Mid season. Heavy bearing. Ripens July and first of August.

BURBANK PLUMS

We grow the best and most reliable trees in the world. Insist on our trees for your planting.

BOSC One of the best early winters pears. A splendid shipping and commercial pear. Moderately long shaped. Solid russet color. Flesh fine grained and highly flavored.

BARTLETT Large size. Golden yellow when ripe, with a beautiful blush next to the sun. Buttery, very juicy and highly flavored; tree a strong grower, bears early and abundantly; very popular. August and September.

ANJOU (BUERRE D'ANJOU)

A large, fine pear, buttery and melting with sprightly flavor; tree fine grower. Very productive. One of the best. October to January

FLEMISH BEAUTY Large, juicy, melting and rich; strong grower and good bearer; very hardy but prefers sunny situation. September and October.

Tualatin Valley Nurseries Cherries Will Bear True To Name

SECKEL Small, rich, yellowish-brown; known; very productive. September and October.

WINTER NELLIS Medium; skin yellowish green, dotted with gray russet; flesh yellowish white, fine grained, of a rich saccharine, aromatic flavor. December.

FALL BUTTER A favorite fall pear: yellow, sweet and juicy. Splendid baking pear. September.

WINTER BARTLETT Extra fine flavor. Fruit large resembling Bartletts. A fine pear for home use.

COMICE A splendid commercial variety being of fine size; good appearance; ships well. October. Fine eating.

GORHAM Resembles Bartlett in size, color, shape, only ripens 2 weeks later. The flavor is sweet with very marked and pleasing aroma. The flesh is white, tender, buttery and juicy. The trees are vigorous and productive and very resistant to blight. We consider this pear equal to Bartlett, and they are finer grained; very profitable for commercial planters. Same price as Bartletts.

ELWERT PEARS A new pear, round as an apple. Ripens late fall. Very large. Better canning than Bartlett. \$1.75 per tree.

KIEFFER PEAR Winter variety. Rich golden yellow. Fine for canning and baking.

New! MAX-RED BARTLETT PEAR New!

(Plant Patent No. 741)

A red sport of Bartlett with all the desirable qualities of Bartlett plus an attractive red color and 10% more sugar by actual test! As the color does not carry through into the flesh, this excellent canning Pear is being widely planted for commercial canners. In hardiness, Max-Red is comparable to Bartlett. The only new Pear of proven outstanding merit!

PRICES ON NEW MAX-RED BARTLETT PEAR—

Retail and Mail Order—4-6 foot, \$2.50 each - \$25.00 per dozen

Commercial Growers (50 and up)—4-6 foot, \$125.00 per 100; 3-4 foot \$100.00 per 100

CHERRIES

There are few more desirable fruits than the cherry. They are planted more and more each year and there is always a brisk demand on the market for good fruit. Cherries thrive in most any dry or well-drained soil. The fruit is delicious whether eaten out of hand or preserved. Be sure you get the genuine Mazzard root. We have trees 50 years old still bearing. We recommend the Mazzard root.

STATE INSPECTED SWEET AND SOUR CHERRY TREES

SPECIAL INSPECTION TO INSURE THE PLANTER OF FREE VIRUS TREES. OUR STATE INSPECTOR AND STATE COLLEGE HAVE GIVEN OUR TREES CAREFUL INSPECTION.

The mother stock of all our cherry trees are heavy croppers. Lots of trees producing a half ton per tree. This insures your future orchard from our efforts. Plant a cherry orchard. Our eastern trade is getting larger every year for the black varieties; in a few years we won't have enough bearing orchards to fill the demand, as there have been very few orchards planted in the last 10 years in comparison to our increase in population. We have a wonderful root system on these trees. They are grown under special care.

CHERRY PRICES ON PAGE 18

PIE CHERRIES

KENTISH or EARLY RICHMOND

Medium size, dark red, melting and juicy, acid flavor. One of the most valuable and popular of the acid cherries and is unsurpassed for cooking. Tree slender grower, exceedingly productive and very hardy. Stands most severe weather.

PIE CHERRY

ENGLISH MORELLO

Black red color, acid, juicy, medium sour.

PIE CHERRY

MAY DUKE

This is one of the best hardy cherries; medium size, dark red, melting, rich and juicy. First of June.

PIE CHERRY

LATE DUKE

Fruit large, roundish, rich dark red; sub-acid. Tree hardy; very valuable. Ripens last of July.

PIE CHERRY

LARGE MONTMORENCY

Large, roundish, red, flesh tender, mildly acid and better quality than the Early Richmond and about 10 days later. One of the popular sorts. Late June. Planted commercially for large canners.

PIE CHERRY — THE BEST

LARGE MONTMORENCY CHERRIES

BLACK REPUBLICAN

Medium sized black cherry with purplish flesh. Very sweet. Good pollinator. Originated by Seth Lewelling, a pioneer nurseryman of Oregon; this variety very good for pollinating R. Ann, Bing or Lambert.

LAMBERT

One of the largest known. Smooth, glossy, dark purplish-red, with numerous russet dots. Almost black when ripe. Flesh dark purplish-red with white vein; firm, meaty, flavor sweet, rich and highest quality. Form roundish, heart shaped. Tree hardy and vigorous. A good shipping variety and one of the best for canning or shipping. Ripens later than Bing.

Bing Cherries

Here is a sample of fine Bing Cherries for the season of 1950. We have a good supply on hand.

BING CHERRY

A large sized black cherry which ripens with the R. Ann and whose habit of growth is similar to the R. Ann. One of the best fresh fruit cherries on the market and is good shipper.

HOSKINS

This is a very fine pollinator for the Royal Ann. We have found it to be one of the best. The cherry is black, resembling the Bing. Very hardy and firm.

ROYAL ANN (NAPOLEON)

A beautiful cherry of large size; pale yellow with bright red cheeks; flesh firm, juicy and sweet. One of the best for market and canning. The hardest of the light yellow cherries and deservedly popular. Early July.

BLACK TARTARIAN

Very large, bright, purplish-black; half tender, juicy, very rich and flavor excellent. Tree a vigorous grower and producer. June. A good pollinator.

NEW DEACON

The best pollinator grown for sweet cherries, especially Bing and Lamberts. Looks like Bing. Firm.

PLUMS, APPLES PEARS, AND PEACH TREE SEEDLINGS

ALL SEEDLINGS ARE 12 to 18 INCHES TALL

25c per Tree in Small Lots — 100 Lots at 17½c each; 1000 Lots at 15c each; 5000 Lots at 12½c each. Seedling Trees for Orchard or Nursery Planting. Plums, Apples, Pears, and Peach Tree Seedlings for Orchard or Nursery planting. Many of our Orchard planters plant these well rooted trees for their own use, and graft or bud them the first year after planting. You can put your own strain of Fruit on these. This is a bargain price to the Orchardist. Sold by the famous Tualatin Valley Nurseries.

QUINCES

The quince is one of the finest fruits for making jelly. We advise planting these for the commercial market. Prices have been about 5c per lb. on the fresh market.

2 to 3 ft \$1.25 each; 3 to 4 ft. \$1.50; 4 to 6 ft. (extra large) \$1.75 each.

ORANGE Large, roundish, somewhat irregular with a small and short neck at the base; fine golden yellow flesh and of excellent flavor. October.

PINEAPPLE One of the Best for home use with large fruit and highly flavored.

GRAPES

Everyone should have a few grape vines in the home garden. They require very little cultivation. If proper selection of varieties is made, can be planted on hillsides that are unsuitable months in the year. They can be trained over fence may have grapes on the tables for several tal as well as useful. To grow for market, they nces, trellises, or doorways and thus be ornamental for other crops. They should, in all cases, have a free exposure to the sun and air.

Large Lots, Write. We Meet Competition. Send Want List for Quotations.

DELAWARE The bunches are small, compact and sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet and refreshing and of the best quality for both table and for wine. Ripens with Concord or a little before; vine is hardy, productive.

NIAGARA Occupies the same position among the white varieties as Concord among the black. Bunch and berries large greenish white, changing to pale yellow when fully ripe. Skin thin but tough. Quality much like the Concord.

CAMPBELL'S EARLY A new, very large and fine early grape. Black, strong, vigorous, hardy vines with thick, healthy leaves; clusters very large, usually shouldered, compact and handsome; berries large, nearly round, black rich, sweet, very good; thin skin; seeds few and small, parting easily from the pulp; a good shipper. Ripens very early, but remains sound on the vines for many weeks. This makes it one of the most satisfactory and profitable market sorts to grow.

RIBIER This is a good wine grape, has a superb flavor.

CONCORD One of the most popular and reliable varieties we possess; bunch large, compact and shouldered; berry large, round, almost black with blue bloom, juicy, buttery and very sweet.

WORDEN Seedling of the Concord, which it greatly resembles in appearance and flavor, but the berries are larger. The fruit is said to be better flavored and to ripen several days earlier. These qualities will give it the foremost rank among native grapes.

BRIGHTON Bunch large, shouldered, berries medium to large, round, dark, red, tender, very little pulp, sweet juicy, slightly aromatic and very good. Ripens early.

FLAME TOKAY Bunches very large and moderately compact; berries large, skin thick, pale red, covered with bloom; fresh, firm, sweet; an old standard variety, always demands a good price in the markets, and as a table grape, more extensively planted than any other variety. October.

ZINFANDEL A California variety. A good wine variety.

Concord Grapes

One of the finest strains of Concord Grapes in the country. Have been selling large plantings to some of the large Juice Companies.

INSIST ON BERRY PLANTS GROWN BY US

ISLAND BELLE This is a very large Blue Grape, by far one of the finest grapes grown. Fine for jelly juice, etc. A wonderful flavor. Grown in large quantities around the Olympic peninsula.

MALAGA Very large; oval; yellowish green; fleshy; one of the best shipping grapes. Immensely productive, thriving in almost any soil. Makes good second-quality raisin. August.

AGAWAM This is a very fine type of grape. This variety will grow real good in the Northwest district. Exceptionally hardy, and a well-flavored variety; red colored. rich; fine flavored; the variety most extensively planted for raisins. September.

THOMPSON'S SEEDLESS (SULTANINA BLANCHE) Very large; greenish yellow; firm; oval; seedless; prized for shipping and raisins. August.

MUSCAT OF ALEXANDER Bunches large, long and loose; berries large, slightly oval, pale amber when ripe, covered with a thin, white bloom; flesh firm, brittle, exceedingly sweet and RIA

CONCORD SEEDLESS GRAPES

This grape is quite new, resembles concord but is seedless. Very fine flavor. \$1.00 per plant; 10 plants for \$9.00

GOLDEN MUSCAT One of the finest grapes for the Northwest, or any other district. Large and sweet.—PRICE 75c Each; 10 for \$5.00.

BOYSENBERRY

The Boysenberry was developed from three blackberries of unknown origin. Cuthbert raspberry and loganberry. All of these berries are hardy. We have found out this last year that Boysenberries will stand a temperature as low as 32 degrees below zero without injury. As far as we know they are the hardiest berry there is.

Newest, largest and best flavored berry grown. We advise to plant them commercially, or for family use; large profits. Our plants are grown here in the Tualatin Valley, giving them a fine root system and very hardy. They will thrive better than plants grown in a warmer climate. We have the genuine Boysenberry plants that come from the original strain.

35c each 5 for \$1.25 10 for \$2.00 25 for \$3.75 50 for \$5.00 100 for \$9.50 500 for \$42.50 1000 for \$75.00

Larger lots, write

Thornless BOYSENBERRY

The standard Boysenberry has been severely criticized for its pronounced thorniness and most all will agree that a smooth caned Boysen would be a valuable improvement on this popular variety. We are happy to announce that we now have it, a true Boysen with perfectly smooth canes, a

very strong grower with heavy foliage, earlier than the parent by seven days, and even more productive and with less acid. Price each, 50c; 5 for \$1.50; 10 for \$2.50; 50 for \$8.50; 100 for \$12.50; 1000 for \$90.00.

RASPBERRIES

The raspberry is one of the most delicious and popular fruits grown. They are always in demand in season and command good prices on the market. For canning purposes they are unexcelled. They are easily cultivated and require little care.

25c each 10 for \$1.25 25 for \$2.75 50 for \$4.50 100 for \$7.50
5 for 75 cents 500 for \$29.50 1000 for \$55.00

These prices for all varieties except Willamette, Newburg, Taylor, New Indian and New Wonder.

CUTHBERT This is the leading red raspberry in California. It is a strong and abundant bearer. The foliage is large and abundant, which affords ample protection to the fruit. The berries are large, a beautiful deep crimson in color, possessing a most pleasing flavor. Unlike many other berries the Cuthbert is a very easily picked berry and holds up well in shipping, consequently is highly prized not only for home use but as a commercial and shipping variety.

LATHAM This is a fine red raspberry. It grows to a good large size, extra fine for canning, also for commercial growing. They are highly recommended among berry growers.

WINFIELD A very large, juicy berry, yet very firm. A superior blackcap. Price on Page 22.

OUR BERRY PLANTS INSURE YOU OF QUALITY ROOT SYSTEMS

ST. REGIS EVERBEARING

Commences to bear early. Ripens early in the season. Large, well-flavored berries and continues to produce until the frost. Price on Page 22.

MUNGER The fruit of Munger is black and resembles Gregg very much. It is a better flavored berry than Gregg, tougher in texture and therefore a better shipper. In size it excels Gregg by 25%. Price on Page 22.

NEW INDIAN SUMMER RED

RASPBERRY Fall bearing, 2 crops a year. Surely a money making berry. Prices: 50c Each; 5 for \$1.85; 10 for \$3.50.

NEWBURGH Introduced by the New York Fruit Testing Association who declare that it is the best Red Raspberry in New York. Has been thoroughly tested throughout the country. Produces heavy, vigorous, healthy and very resistant to diseases.

Berries are unusually large, very firm, extra fancy flavor and do not crumble. The color is a bright attractive red. It is the heaviest yielding red raspberry. Never known to winter kill. Each 25c; 5 for \$1.00; 10 for \$1.50; 25 for \$2.85; 100 for \$6.75; 500 for \$28.50.

WILLAMETTE One of the newest varieties released to the public. Has been thoroughly tested. We believe it will be one of the main varieties to be planted in the future by commercial growers and the home grower. We recommend it highly. It is a cross between the Newburgh and Lloyd George. Especially good for canning and freezing. Very productive and the fruit is large and firm. Hardy and a vigorous grower. Each 25c; 10 for \$1.75; 25 for \$3.50; 50 for \$5.00; 100 for \$9.00; 500 for \$37.50; 1000 for 67.50.

CUMBERLAND A healthy, vigorous grower, throwing up stout, stock, well branched canes that produce immense crops. Fruits very profitable; large, firm, quality about same as Gregg, keeps and ship well as any of the Blacks. Price on Page 22.

NEW WONDER THORNLESS

RED RASPBERRY Is perfectly hardy, very healthy plant. Fruit nice red color—same size fruit as Latham. Sometimes bears second crop. Never winter kills in Northwest to our knowledge. Prices: 50c each; 5 plants for \$2.00; 10 plants for \$3.85; Large Lots Write.

TAYLOR Introduced by the New York Experimental Station. Fruit very large. Color bright attractive red. Long conical-shaped. Flavor sub-acid, quality good. Has thick flesh small cavity, very firm, will not crumble, wonderful canning. Plants are tall, vigorous. Stands extreme cold weather. Each 25c; 5 for \$1.00; 10 for \$1.50; 25 for \$2.85; \$6.75 per hundred; 500 for \$28.50.

NEW WASHINGTON

RASPBERRY This is a very prolific grower and a heavy producer. Good for freezing very fine for the family or large commercial grower. Many hundreds of acres are being planted in the Puget Sound District. Price 25c each; 5 for \$1.00; 10 for \$1.75; 25 for \$3.50; 100 for \$7.50; 1000 for \$67.50.

YOUNGBERRIES

Our plants are taken from the best and most improved strains. Large profits—up to \$1,000 per acre—are made from growing this new popular berry. Try out 100 plants now. They are extremely hardy. We have sold Youngberry plants all over the Northwest and east of the Cascade mountains. They are a very hardy plant and there also is a ready market for the fruit on the fresh market at all times. Also a brisk demand at the canneries.

1 year plants 35c each; 5 for \$1.35; 10 for \$1.75; 50 for \$4.75; 100 for \$8.50
500 for \$32.50

Youngberry 2 yr. transplants, 50c each; 10 for \$3.50; 100 for \$17.50
Large Lots—Write

PLANT THE WONDERFUL NEW THORNLESS YOUNGBERRY

The THORNLESS is superior to the parent, thorny type only to the extent that the hard

punishing and annoying thorns are not present. In other respects there is little difference. 1 yr. old. Each 35c; 10 for \$2.75; 25 for \$5.50; 100 for \$17.50.

LOGANBERRIES

LOGANBERRY Fruit long, dark red, partakes of the flavor of both the Raspberry and Blackberry. A well known berry, is planted commercially throughout the Northwest. Ripens in May.

Each 35c; 5 for \$1.50; 10 for \$2.50; 100 for \$9.00
50 plants for \$5.75.

THORNLESS LOGANBERRIES

These do not have stickers. Each 50c; 5 for \$1.75; 10 for \$2.75; 100 for \$17.50; 1000 for \$125.00
50 plants for \$9.00.

BLUEBERRIES

3 and 4 yr. plants for garden planting \$1.75 each; Large Size, 2yr. old \$1.00 each; 10 for 85c each;
 50 for 75 cents each; 100 for 65 cents each; 500 for 60 cents each — On Larger Lots Write
 One Year Old Plants 75c each. — 2 yr. old plants are best for field planting.

A Basket of Genuine Blueberries

JERSEY Late—The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden-brown. The berries are among the very largest, light blue and ripens after Rubel. One of the best for commercial plantings.

RANCOCAS Early—The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

RUBEL Mid season—A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching $\frac{1}{2}$ of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

GIANT HYBRID BLUEBERRIES

Plants Last a Lifetime

Easy to grow. Profitable and Ornamental. This industry is new in the West—demand will be good for a long time. Order early. GET IN ON THE GROUND FLOOR.

The cultivated blueberry has been one of the most profitable fruit crops grown in the United States. Berries resemble grapes in size. At maturity the bushes usually exceed 6 feet in height.

Fruit ripens over a long season and keeps well on bush after ripening. The blossom is a Lily of the Valley type flower.

Plant will start bearing the third year and increase until about the seventh year.

Canners and freezers have eagerly bought all blueberries they could secure paying very high prices per pound—as high as 50c per pint.

If your soil is acid and sufficiently moist, by all means plant as many blueberries as possible.

We advise 2 yr. plants—best for a commercial planting. Plant 7 feet to 8 feet apart each way.

We the Tualatin Valley Nurseries have by far the best and largest supply of Blueberries in the West. We list and sell 4 of the best varieties that we have found are best after several years of testing.

BLACKBERRIES

We have a nice assortment of several different varieties of Blackberries. All are grown from good healthy plants. Prices are as follows:

.50c each — 5 for \$1.85 — 10 for \$2.75 — 100 for \$12.50

HIMALAYA This is an exceptionally fine berry. Very sweet. Comes earlier than the evergreen. Good for home use or for selling on the Fresh Fruit Market as well as canneries.

EVERGREEN This is the regular Oregon native blackberry. Grows wild in most sections west of the Cascade mountains. A prolific bearer; makes a wonderful berry.

LUCRETIA DEWBERRY This variety of berry is something similar in size to a blackberry but has more the color of a youngberry. It makes a very fine berry. It has a good market on the Fresh Fruit stands.

CASCADE BLACKBERRY

50 Cents Each; 5 for \$1.75; 100 for \$25.00

THORNLESS EVERGREEN

BLACKBERRY New Strain, No Thorns, very similar to regular evergreen, being planted commercially in a large way. Much easier to pick. Grow just as well, produces as heavily as regular. Under cultivation, do extremely well.

Prices: 50c each; 3 for \$1.00; 10 for \$2.75; 25 for 5.00; 100 for \$17.50.

PLANT TUALATIN VALLEY TREES FOR MORE PROFITS

GOOSEBERRIES

Extra Heavy Year Old and 2 year Old
50c each; 5 for \$1.85; 10 for \$3.00
50 for \$9.50; 100 for \$17.50
1000 for \$135.00

OREGON CHAMPION Large, skin light green with flesh very sweet, juicy, excellent flavor; very prolific bearer and will not mildew.

Large Lots, Write for Special Prices.
We Have the BEST Commercial Strains

NECTAR BERRY

One of the latest introductions among the vine berries whose habits of growth and fruiting are similar to the Boysenberry. Originating at El Monte, California, it has been tested alongside of all the other standard sorts and claimed by the originator and those who have

watched it closely to be larger and much sweeter than Boysen, and more productive than any other berry of its type. Prices: 50c each; 5 for \$1.75; 10 for \$2.75; 50 for \$8.50; 100 for \$15.00; 500 for \$55.00; 1000 for \$95.00. Larger Lots, write.

STRAWBERRIES

STREAMLINER EVERBEARING STRAWBERRY

NEW! — THE WORLD'S WONDER BERRY — NEW!

Delicious Streamline Everbearing Strawberries

Bears All Summer Until Frost — Produces Sweet, Large, Red Berries

10 plants for \$1.00; 25 plants for \$1.75; 50 plants for \$3.50; 100 for \$6.50; 500 for \$25.00; 1000 for \$45.00

Minn. 1166 Evermore Everbearing Strawberry

Large, firm and most attractive for fresh market. Excellent flavor. Dark red clear thru. Heavy bearing from July till freezing. Out-yield other everbearing. Same Price as Streamline Strawberry.

Older Varieties Everbearing Strawberries

25 for \$1.25; 50 for \$2.50; 100 for \$3.75; 200 for \$6.50; 500 for \$12.50
1000 for \$22.50

MASTADON EVERBEARING

One of the best all around everbearing strawberries grown. Good large size and heavy producers.

GEM EVERBEARING

This is an exceptionally fine improved strain of strawberry; produces exceptionally fine flavored fruit.

STRAWBERRIES ARE LUSCIOUS FRUIT, More Varieties On Page 26

ROCK HILL STRAWBERRIES WE HAVE A FINE STRAIN

The Rockhill introduced in Oregon several years ago, and the Wayzata as it is called in the Great Lakes Region, produces fruit identical in size, flavor and seasons. In northern climates the Wyzata is inclined to make a few runner plants, whereas the Rockhill seldom shows this characteristic. The Wyzata, however performs identically here with the Rockhill as neither of them often make runners. The foliage and other plant characteristics are identical.

The size and percentage of large No. 1 grade

berries produced by these varieties are above the average, and they have a flavor and texture unlike any other strawberry we have ever grown—indescribably delicious.

Should be set about 15 x 24 inches—equivalent of 15,000 plants to the acre. Responds well to both overhead and ditch irrigation and thrives well in most any type of soil in which other varieties can be successfully grown. Plant prices: 10 for \$1.25; 25 for \$2.50; 50 for \$4.75; \$8.50 per 100; 1000 for \$65.00

REGULAR STRAWBERRY PLANTS

| | | | | |
|---------------|---------------|-------------------|----------------|-----------------|
| 25 for \$1.00 | 50 for \$1.85 | 100 for \$3.50 | 200 for \$5.75 | 500 for \$10.95 |
| | | 1,000 for \$18.50 | | |

INSPECTED BERRY PLANTS LARGE LOTS, WRITE

Few fruits offer greater returns for land and labor invested than strawberries. With little care and attention they thrive in most any soil, while extra efforts and cultivation will be rewarded by especially fine crops. Whether you grow for market or home use only, have the best sorts by all means. Below we list the cream of all for this part of the country.

NEW OREGON This handsome new strawberry has made a very favorable impression. The berry is very large, firm and handsome; rich, dark red, extending to the center. The flavor is rich, sweet and delicious. For table use and canning it cannot be equalled. The Oregon ripens very early in some localities will have a second crop in October. This is not true, however, every year. Very prolific and a heavy bearer.

MARSHALL One of our best Western varieties and very popular wherever known. Marshall is one of the blood-red varieties.

BRIGHTMORE A brand-new variety. Introduced at Oregon State College. Excellent market berry, fine for freezing or preserving. Resistant to disease. They will produce up to 8 tons of marketable berries per acre.

RED HEART Best and most popular canning berry. It brought 1c per pound premium over other varieties at the canneries. Heavy bearing vines; healthy, thrifty growers. Advise planting these for home use or commercial planter.

NEW - NORTHWEST STRAWBERRY - NEW

New improved variety, similar to Marshall, heavy bearing, bright red berries can remain firm 4 days after turning red. Very resistant to disease.—PRICES: 10 for \$1.00; 25 for \$1.75; 50 for \$2.85; 100 for \$5.00; 1000 for \$27.50.

CURRANTS

The currant is one of the most valuable of small fruits. They mature just before raspberries and can be used either raw or cooked. Being very hardy, they do not winter kill and require little care.

| | | | |
|------------------------------|-------------------|------------------|---------------|
| Extra large plants, 50c each | 5 for \$1.75 | 10 for \$2.85 | 50 for \$9.50 |
| 100 for \$17.50 | 1000 for \$125.00 | Large Lots—Write | |

CHERRY The largest of all red currants; berries sometimes more than one-half inch in diameter; bunches short; plant very vigorous and productive when grown on good soil and well cultivated.

FAY'S PROLIFIC For size, beauty and productiveness it is a remarkable red currant. The berry is equal to cherry currant, while the flavor is superior. The stem is long, which permits rapid picking, valuable for both market and home. Fruit hangs well, never dropping, as in other currants.

PERFECTION Bright red, and of a size larger than the Fay; size of berries is maintained to end of bunch. It is one of the most productive currants. Rich, mild, sub-acid flavor and having plenty of pulp with few seeds. You can pick Perfections as fast as cherries.

RED LAKE A large currant good commercially and for home use. Planted in quite large acreages in the East. 5c per plant more.

ASPARAGUS

2 yr. old plants, 12 for \$1.00; 25 for \$1.50; 50 for \$2.50; 100 for \$3.75
500 for \$9.50; 1000 for \$15.00; Large Lots—Write

WASHINGTON A new rust-resistant pedigreed asparagus. As a standard variety for the production of fancy as-

paragus for the home or market, it stands ahead of all others for size, vigor, tenderness, quality and rust-resistance, the best variety.

RHUBARB

RIVERSIDE GIANT

Very large, fine
canning. Larger

MAMMOTH

Large, early, tender and fine;
the very best of all.

PRICES: CROWN DIVISIONS—

35c each; 5 for \$1.25; 10 for \$1.85
50 or more at 20c each; 100 for \$15.00

STRAWBERRY A good variety for pie
or canning.

HORSERADISH

25c each . . . 5 for \$1.00 . . . 10 for \$1.50 . . . 25 for \$2.50 . . . 50 for \$4.50

As a table relish horseradish is without a superior. Its cultivation forms an important industry in many sections. Should be planted in the early spring.

FIGS

The following two varieties of Figs we have listed are the only two varieties that can be recommended for the Northwest that will produce and bear crops each year.

↙ **LATTARULA FIG** This is a two-crop variety, July to October 30. Lemon-yellow when ripe, thin skin and very sweet. Fine for drying, preserves, jams and canning. Self pollinator; hardy, fast grower; bears the third year. Best commercial variety for the Northwest. Price: each, small size \$2.50; large size, \$2.85.

↖ **NEVERALLA FIG** This is a seedless Fig. When ripe resembles a peach in color. It is very sweet. Bluish-black skin. Ripens during September and October; one crop a year. Extremely hardy; likes sunshine and reasonable amount of moisture. Bears the third year growth, and a very fine commercial Fig. Small size \$2.50; Select, \$2.85 each. Best for most localities.

BROWN TURKEY FIG AND KADOTA FIG

These varieties are more adapted to warmer climates than the northwest. They do exceptionally well in most parts of the country where climate is mild. Price each; 3-4 ft. \$1.50 each; 4-6 ft. Select Trees \$2.50 each.

Grafted Persimmon Trees

\$2.75 Small size—\$3.50 Large Size.

HOP PLANTS

Each 50c — In Lots of 10, \$3.50
Large Orders Write We Have 70 Acres of Hops.

NUT TREES

↙ **BUTTERNUT** This is a variety of tree something like a Black Walnut only with larger leaves, 4-6 ft. \$2.75 each

↖ **HICKORY NUT TREES** Plant a Hickory Nut for beauty. 4-6 foot \$2.75 each.

NUT TREES

The Pacific Coast is exceptionally well adapted to the growing of nut trees. We have one of the finest lots of nursery grown tip-layered filbert trees that you could possibly get. All of our filberts and walnuts are grown from highly productive strains. You will profit by buying your trees from us on account of our many fruit and nut orchards. Our experience is your gain. In filbert trees we can either furnish the tip-layered stock or the grafted trees. We can also furnish walnut trees either grafted on to the black walnut or on to the Franquette seedling walnut root. We have large walnut orchards of our own. Let us help you to plan your future orchard. Do not be misled.

WALNUTS

FRANQUETTE WALNUT (Grafted on Black)

This is the most popular variety in the Northwest. Very large and long, coming to a sharp point, shell is hard but thin enough to hull easily, and above all, seals well, eliminating loss by molding; has proven to be a vigorous grower, young and prolific bearer, making a beautiful as well as profitable shade tree and has nearly eliminated the sale of all other trees used for shade before the Franquette was introduced and had proven its worth. Nearly all curb plantings in the cities of the Northwest are now plant-

ed to Franquette walnut trees. We have them in large sizes for curb plantings.

Grafted Franquette Walnut Grafted on Black

| | Each | 25 or over | 100 or over |
|--------------------------|--------|------------|-------------|
| 3 to 4 foot | \$2.50 | \$2.00 | \$1.75 |
| 4 to 6 foot | 2.85 | 2.50 | 2.00 |
| 6 to 8 foot | 3.50 | 3.00 | 2.50 |
| 8 to 10 ft. Spec. Select | 4.50 | | |
| Large Lots, Write. | | | |

FRANQUETTE WALNUT (GRAFTED ON FRANQUETTE SEEDLING)

They are better than Black Root. We have the largest block in the state. Many of the leading walnut growers have found that the walnut trees grafted on Franquette seedlings are a longer lived tree. We have one planting of our own, the trees are 30 years old and they sure are beautiful. Trees producing large crops. The prices of these trees are higher as costs are greater for growing. Plant Tualatin Valley Nursery grown

Grafted Franquettes on seedling roots. Tualatin Valley Nursery has the only large block of Grafted Franquettes on Franquette Seedling Roots in the Northwest. 6-8 ft. \$5.00 each; 4-6 ft. \$4.50 each; 3-4 ft. \$3.50. Write for prices on large lots.

We grow one of the best Vrooman strain Franquette Walnuts in the state. We have one of the largest plantings in bearing.

MAYETTE WALNUT ON BLACK

We can supply small amount of Mayette Walnuts. These are a round nut, very fine for home use. Not used to a great extent for commercial plantings in Oregon and Washington. For home use—suggest a tree each of the Franquette and Mayette—

2-3 ft. \$1.75 each; 3-4 ft. \$2.00 each; 4-6 ft. 2.75 each

FRANQUETTE WALNUT SEEDLINGS

3-4 foot, each \$1.75; in lots of 10 \$15.00

4 to 6 foot, each \$2.00; in lots of 10 \$17.50

Lots of 100 — 25c less each size

ALL OUR WALNUTS ARE SELF POLLENIZING

ALMONDS

| | Each | 10 50 | 50 300 | |
|-----------------------|--------|-------|--------|--|
| 2-3 ft. | \$1.00 | .90 | .75 | |
| 3-4 foot Select | 1.25 | 1.00 | .85 | |
| 4-6 foot Extra Select | 1.50 | 1.25 | .90 | |

Large lots, write.

DRAKE'S SEEDLING Tree a strong grower and heavy bearer. Like the Texas Prolific it is valued for fertilizing other varieties of almonds. Nut medium size, kernel soft, plump and sweet. Soft shells.

NE PLUS ULTRA Large and very long; soft shell; hulls free. Tree heavy and regular bearer.

Order at least three varieties to get proper pollination. Almonds will grow in the Northwest.

I. X. L. A vigorous grower and sure cropper, producing nuts of large size and handsome appearance; shell thin; most popular commercial sort.

NONPAREIL Tree beautiful, slightly weeping; nut sweet and shell very thin. Best for the home.

TEXAS PROLIFIC Closely resembles Drake's Seedling Kernel very plump and of medium size, well filled, shell soft, hulls very easily. Valuable pollinator.

FILBERTS

*Oregon's
Finest Nut*

These are mostly planted in Oregon and Washington, we have a very large acreage of our own, very easy to grow, have reports from area where we have sold small lots of trees in cold areas and they have done very well. Filberts should be planted 18 to 25 ft. apart, but we have a small planting at 15 feet, these produce heavy crops each year. We plan on removing every other tree when they start crowding each other. Prices as follows:

NURSERY GROWN, TIP LAYERED — Barcelona, Duchilly, Daviana

| | each | 10 to 50 | 50 to 300 | 300 to 500 | 500 to 1000 |
|-------------------|------|----------|-----------|------------|-------------|
| 2 to 3 ft. | .85 | .70 | .55 | .50 | .45 |
| 3 to 4 ft. | 1.00 | .85 | .70 | .65 | .60 |
| 4 to 6 ft. Select | 1.25 | 1.00 | .85 | .75 | .70 |

The Barcelona is a commercial round nut. The Duchilly is a long nut.

The Duchilly and Daviana are pollenizers for the Barcelona.

One pollenizer is plenty for 9 Barcelona.

DWARF Trees

We can supply the following varieties in Dwarf and Semi-dwarf as there is only Dwarfs in Apples and Pears; all others are semi-dwarf. Prices are as follows:

\$2.50 ea.; lots of 10, \$20.00 50 or more \$1.75 ea.

TOP NO. 1 QUALITY GRADE**

TURKISH FILBERT This is a wild variety of tree, grown in the mountains of China. It is very hardy. Grows to a height of 100 feet or more. This tree has a small size nut. Makes a good shade tree and also the nut is good flavored. Price, each, 4-6 ft. \$1.50 each; 6-8 ft. \$2.75 each. A most beautiful shade tree.

SILVER MAPLE A very fast growing shade tree. It has beautiful yellow-silvery colored leaves in the fall. Will grow in most all cold climates. Price each, 3 to 4 ft. \$1.25; 4 to 6 ft. \$1.50; 6 to 8 ft. \$2.00; 8 to 10 ft. \$2.75.

Flowering Shade Trees

The varieties of flowering shade trees which we have listed here are suitable for either east or west of the Cascade Mountains. All are good and hardy and will stand zero weather. We also have some varieties not listed. In case you are interested in them, kindly write us. The varieties we do list are the best, selected from hundreds of varieties.

TULIP TREES These have a very large leaf. Trees aren't very fast growing, 3-4 ft. \$1.50; large grade, 4-6 ft. \$1.75; 6-8 ft. \$2.75 each

BLIRIANA PLUM Purple leaf plum, a beautiful flower in the spring. 3-4 ft. 85c; 4-6 ft. \$1.25; Select Trees \$1.75 each.

THUNDER CLOUD Another purple leaf tree. Leaf keeps purple all summer, a pink blossom in the spring. 3-4 ft. \$1.25; 4-6 ft. \$1.50; Select Trees \$1.75 each.

REDBUD This is a beautiful early-Spring flowering tree. You can make it into a bush or shade tree. Price: 3-4 ft. \$1.75 each

WEEPING RED PEACH

This is a very beautiful peach. The flowers are very red, and the trees droop somewhat. Select Trees \$1.75 each

FLOWERING PEACH Beautiful blossoms in early spring. Your choice of three colors. RED, PINK, or WHITE, 3-4 ft. \$1.00; 4-6 ft. \$1.25; 4-6 ft. \$1.25; Select Trees \$1.75 each.

HOLLYWOOD Has a purple leaf all summer, is the oldest type of purple leafed tree. Beautiful up-right shape. 3-4 ft. \$1.00; 4-6 ft. \$1.25; Select \$1.50.

WHITE or PINK FLOWERING ALMOND (Prunus Glandulosa)

A vigorous, beautiful tree, covered in May with rose colored blossoms like small roses; hardy. 2-3 ft. \$1.00; 3-4 ft. \$1.25; Select \$1.50 each.

FLOWERING QUINCE Red Flowers. Select Trees \$1.50 each.

TRILOBA FLOWERING PLUM

Purple leaf all summer and a small rose flower in the spring. 3-4 ft. \$1.25; 4-6 ft. \$1.75 each.

Flowering Crab

All varieties of the Flowering Crabs at the following prices: 3-4 ft. \$1.50; 4-6 ft. \$1.75; Extra Select \$2.50 Each.

SCHEIDECKERI Double pink.

NEIDZWETSKYANA Red vein, red blossom.

BECHTEL Delicate pink.

PURPUREA This is very beautiful. Good sized red blossoms. Very attractive.

HOPI CRABAPPLE—PURPLE

Very beautiful. Has ornamental apple in fall about the size of a cherry. Has a tendency to partly weeping.

Ornamental Flowering Trees

Oriental Flowering Cherries

We have the following beautiful varieties in various colors. One of the finest trees for your front yard.

FLOWERING CHERRY

KWANZAN Wonderful tree for specimen or group planting. Large double pink, long-stem flowers borne in large clusters enable this tree to stand out as one of the best flowering trees. 3-4 ft. \$1.75; 4-6 ft. \$2.25; Select Trees \$2.50 each.

MT. FUJI This is one of the most beautiful flowering cherries grown, with a pure-colored white flower; very large. Price each, 3 to 4 foot \$1.75; 4 to 6 foot \$2.50 each.

Oriental Weeping Cherries

Beautiful trees. Single and double varieties; selected trees, 5-7 ft. \$4.50 each; Select 6 yr old tree \$5.50. (See Picture on this page).

ORIENTAL WEEPING CHERRY

Ornamental Shrubs

We are listing the very best shrubs for most localities. Most varieties are quite hardy although we have a quantity of varieties which are limited. Space does not allow to list everything, so if there is anything you are interested in kindly write us for quotations.

FORSYTHIA This is a deciduous plant. Will grow in cold countries. It is very beautiful, having yellow bell flowers in very early spring. 12 inches 85c each; Select plants, \$1.50 each.

EVERGREEN FLOWERING

BARBERRY Has a very beautiful yellow flower in late winter and early spring. 1 ft. plants, \$1.75 each.

PFITZERIANA (Pfitzer's Juniper) A fine spreading or prostrate form. Fine for banks or slopes or in rockeries. Will stand very dry or exposed places. 18-24 in. plants \$2.85 each; Extra large \$3.50 each.

SKIMMIA (Japonica) A low compact plant with heavy dark-green leaves and clusters of bright-red berries in the winter on female plants. Plant both male and female plants to insure bearing. 12-15 inch \$2.50 each.

BARBERRY RED This has a beautiful red leaf. Price each, large, \$1.50.

TAMARISCIFOLIA (Creeping Juniper) A trailing variety with distinct and handsome foliage, valuable for rock work and edges of groups and borders. 18 to 24, \$2.75 each; extra large \$3.50 each.

CEDAR (Cedrus) Deodara (Himilaya Cedar)—The most graceful of the Cedrus and often considered the finest individual evergreen tree. Silvery blue, feathery foliage, borne on long, drooping branches. 3-4 ft. \$3.75 each

AUCUBA (Japonica) We grow both variegated and plain leaved. Large glossy, laurel-like leaves. Large berries ripening to bright red in early spring. Used in shaded location 15-18 inch \$2.25 each.

OREGON GRAPE Dark glossy foliage. Native of Oregon. Beautiful yellow flowers followed by blue berries. Large Size Plants \$2.00 each.

Order Now! Prepare Today For The Future

Whether it be Shade Trees or Flowering Shrubs for relaxation and enjoyment, or Berries, Nuts or Fruit Trees for profit or just your home use—**ORDER THEM TODAY**—due to strikes and shortages of labor, during this period, our stocks on some items are the lowest in our history—Order today—**NOW**—while stock is still plentiful. And through the coming years reap the harvest, that through procrastination you will never receive.

Imp. All Red Delicious

Plant These Reliable Trees for Greater Profits — They are Superior in Flavor, Quality, and Productiveness, and will Sell much easier than other strains in the Fruit Markets of the world.

BRIDAL WREATH Late blooming, April or May. Flat, single white flowers making the entire bush into a huge snowball. Very graceful arching form, beautiful rounded leaves, with scalloped edges. 18 to 24 inches \$1.00.

CHINESE JUNIPER Color light green. Very compact. A column-type grower. A fine plant for around the home 2 to 3 ft. in height. Price each \$2.85.

IRISH JUNIPER This plant is similar to the Chinese Juniper, only it is more slender in growth. This is also a very good plant for landscaping! 2 to 3 feet in height. Price each, \$2.85.

DOUBLE DEUTZIA ROSEA (Scabra Plena) One of the most satisfactory shrubs to plant for spring blooming, either singly or in masses; bearing a profusion of pink or white blossoms on long, slender racemes of 4 to 6 inches long; easy of culture, thriving in almost any soil. Large plants \$1.00 each.

DEUTZIA PRIDE OF ROCHESTER Produces large white flowers, tinged with rose; vigorous grower, profuse bloomer and one of the earliest to bloom. 18 to 24 inches 85c; extra large \$1.25.

DEUTZIA WATERER Good variety (D. Scabra Wateri) with very large double white flowers, tinged with pink; borne in large, loose clusters. Robust grower and very hardy. 18 to 24 inches \$1.00 each.

ARBORVITAE, Thuya Occidentalis Hotveya — Round headed globe-shaped form. A bright green during summer, changing to a darker shade in winter. 2ft. balled specimens, \$2.75 each.

PYRAMIDALIS Perhaps the best known Pyramidal tree. Narrow and compact. Very little pruning is ever required to keep them in perfect shape. 3-4 ft. \$3.50; 4-5 ft. \$4.50; Selects large, \$5.75 each.

GREEN BARBERRY Used extensively where a good bushy hedge is desired. The foliage is an excellent green which turns a beautiful coppery red in the fall, followed by pretty red berries. Not susceptible to wheat rust. Can be grown either trimmed or untrimmed, with a height of from 1½ to 3 ft. 18 to 24 inches 85c.

MOCK ORANGE (Lewis) Not so strong a grower as the foregoing varieties. Flowers large and abundant. Does well throughout the Northwest. Extra large, \$1.25.

COMMON SNOWBALL Grows 6 to 8 feet high; (V. Opulus Sterile) the old fashioned snowball; its large, globular clusters of pure white flowers are produced in May and June and make a very attractive appearance. Select Trees \$1.75 each.

CAMELLIA PINK This pink variety is a fine variegated color. They are as good a grower as any of the others. Large size \$3.75; Extra large \$4.75. Speciman plants \$7.50 each; Small plants \$2.85 each.

CAMELLIA DOUBLE RED The Camellia Double Red is a very dark color. We can furnish these in beautiful shaped plants. Large plants \$3.85; Extra large \$4.85. Speciman plants \$7.50 each; Small Plants \$2.75 each.

WHITE CAMELLIA PURITY
Same Price as Red Camellia.

Deciduous Flowering Shrubs

For planting and taking care of Rhododendron, Azalea and Camellias, be sure to keep in mind that you use Peat Moss in planting Azaleas and barn yard fertilizer is also very good. We do not advise commercial fertilizers. The Rhododendron and Azaleas will thrive much better with barnyard fertilizer. Also, we advise if your soil is a trifle sweet to pour buttermilk on the soil around the plants. Do this 4 or 5 times during the early spring and early summer.

* * *

ABELIA Dark glossy green leaves and pink tubular shaped flowers from July to late Fall. A splendid hardy shrub for the coast region. 2-3 ft. \$1.00; 3-4 ft. \$1.50.

ROSE OF SHARON A beautiful deciduous shrub. Very hardy and will grow in most any climate. Price each, 12-15 inches \$1.50. Colors, white, pink and purple.

ROSES

ROSE PRICES ARE ON PAGE 38

MME. CAROLINE TESTOUT (H.T.)

A grand rose of the La France type, but with flowers larger and finer. Color, bright satiny pink; very fragrant and free in bloom. One of the handsomest roses and should be planted extensively.

MME. EDOUARD The famous winner of the Daily Mail **HERRIOTT (H. T.)** prize. The color being cotta bronze and geranium red, a new combination of colors in a rose.

G. A. VAN ROSSEN Variegated pink, most beautiful of all.

E. P. THOM Lemon Yellow. Most Beautiful Buds.

NORMAN LAMBERT Unique copper orange. A great beauty.

PRESIDENT HOOVER New, vivid cerise, red tones with yellow. Beautiful.

FRAU KARL DRUSCHKI (H. T.) The white American Beauty. Makes splendid buds and immense flowers; perfectly double.

RADIANCE RED America's favorite red. Very beautiful.

HOOSIER BEAUTY (H. T.)

A grand new hybrid tea rose of American origin. Flowers dark crimson, shaded with maroon and veined with black; petals of remarkable substance—like so much crimson velvet; buds beautifully formed, with fine, pointed shape, opening into large, double flower.

IMPERIAL POTENTATE (H. T.)

Rich, rosy carmine, fine buds, splendid cut flower, sweetly scented.

KAISERIN AUG. VICTORIA (H.T.)

Elegant large pointed buds; large, full, double flowers; color delicate creamy-white; fragrant.

LADY HILLINGDON (T.)

Deep apricot yellow, long and pointed bud. Flowers are of good substance and very lasting; foliage luxuriant; a fine forcing or garden rose, excellent for cutting.

LOS ANGELES (H. T.)

Flame pink toned with carol and shaded gold at base of petals. Beautifully formed, fragrant, vigorous and very free blooming. Nothing better.

GENERAL MAC ARTHUR

Double, open, very fragrant, Tyrian rose in color.

ANGELE PERNET Orange red in bud, copper golden open.

DAME EDITH HELEN Large, pink.

E. G. HILL Red, very beautiful.

AMI QUINARD Long-pointed, dark bud; flower large, cupped, fragrant, blackish garnet and coppery scarlet.

AUTUMN Flower double, cupped, fragrant, burnt orange streaked red. Free, recurrent bloom.

BETTY UPRICHARD Large, open semi-double, very fragrant, delicate salmon-pink, reverse carmine with coppery sheen. Very vigorous.

BRIARCLIFF Columbia sport. Large long-pointed bud; flower 4½ inches across, double, fragrant, deep rose-pink at center, lighter on outer petals, with touch of green at base. Extensively grown under glass. Vigorous.

CATHERINE KORDES Large, double high-center, fragrant flower, glowing dark scarlet. Young foliage blood-red. Very vigorous.

CHARLES P. KILHAM

Large, fine shape, faint tea fragrance, Oriental red-orange, suffused glowing scarlet. Vigorous, bushy; good bloom.

CHRISTOPHER STONE

Flower semi-double, large, old rose fragrance. Vivid scarlet, overlaid velvety crimson; large cluster of golder stamens.

CONDESSA DE SASTAGO

Large, double, cupped, fragrant flower, Oriental red and yellow, distinctly two color. Glossy, dark foliage.

COUNTESS VANDLA

Orange-copper, pointed bud. Large flower, brilliant pink lightened salmon, yellow at base. Very distinct. Profuse bloom.

EDITH NELLIE PERKINS

Outside Orient red shaded cerise-orange, inside salmon-pink flushed orange. Few thorns, good bloom.

ETOILE DE HOLLAND

45 petals, rich old rose fragrance deep, bright red

OUR TREES GROW AND GIVE RESULTS—ASK THE LARGE PLANTER

HINRICH GAEDE Nasturtium red, pointed bud. Double, large, high-centered flower, open raspberry fragrance, orange yellow with nasturtium yellow glow.

HEINRICH WENDLAND

Large double, intense fruity fragrance, unfading nasturtium red, reverse deep golden yellow. Vigorous.

SUNBURST (H. T.) A veritable giant among yellow roses

OREGON CRIMSON Ovoid bud; large, double, persistent old rose fragrance color between red and pink—hence the name "Crimson Glory."

MRS. PIERRE S. DU PONT

Reddish gold, long-pointed bud; fragrant, golden yellow, profuse bloom.

McCREDY'S SCARLET double, high-centered, velvety crimson-scarlet, base orange, upper petals deep crimson.

McCREDY'S YELLOW Bright buttercup-yellow. Dark, glossy, bornzy foliage.

TALISMAN Brilliant orange, gold-red buds; long stem.

CLIMBING ROSES

ROSE PRICES ARE ON PAGE 38

SUNBURST (Cl.)

A climbing sport of that peer of yellow roses, Sunburst—the much-sought new French rose. A true pillar rose of strong growth, bearing freely; very large cadmium yellow flowers, beautiful either in bud or open flower.

CLIMBING MME.

Brilliant coral-red buds and flaming flowers of orange-red and salmon. Moderate, climbing growth and a continuous and liberal bloomer.

PAULS SCARLET CLIMBER

By all means the most brilliant rose known in any class because of its clear, vivid, shining scarlet in large semi-double flowers. These flowers never turn blue but retain their intense coloring until petals fall. Cannot be too heartily recommended as essential in any garden.

EDOUARD HERRIOTT

Flaming flowers of orange-red and salmon. Moderate, climbing growth and a continuous and liberal bloomer.

TALISMAN CLIMBER Bright orange, gold-red buds.

CECIL BRUNNER CLIMBER

A baby rose. Small pink flowers.

PRESIDENT HOOVER

This is one of the most beautiful climbers grown. A two-toned red and yellow.

TREE ROSES

PRICES FOR TREE ROSES \$3.75 Each, Selected Plants, 3 to 4 ft. Stems

We can furnish tree roses in the following varieties and colors.

E. G. HILL

Red.

ETOILE DE HOLLANDE

Deep Bright Red.

KARL DRUSCHKI

White.

PRESIDENT HOOVER

Two-toned, red and yellow.

E. P. THOM

Yellow.

DAME EDITH HELEN

Large pink. Large selected trees, about 4 ft.

TALISMAN

Brilliant orange, gold-red buds.

Hardy Climbing Vines and Shrubs

Vines are useful in many ways. They give quick results when planted on a new place, before trees and shrubs become established. For covering fences, rocks, wall, banks and trellises they are peculiarly adapted. A porch without a vine is desolate and incomplete.

SCARLET TRUMPET

HONEYSUCKLE (*L. Sempervirens*)

One of the handsomest in cultivation; a strong, rapid grower; flowers a bright scarlet, not much odor. Nice plants, \$1.25 each.

ENGLISH IVY

This ivy is green with round-shaped leaves. Very beautiful. Good for bank covering or very nice for fences or side of building covering. Hardy. No. 1 plants, \$1.00 each.

CLEMATIS JACKMANI

This variety is better known than any other, and still stands as one of the best. It is a strong grower, and produces a mass of intense violet-purple flowers four to six inches in diameter; from July to October. \$1.25.

FIRETHORN

Good variety to plant next to your home, very hardy orange colored berries. Beautiful in fall and early winter. Green foliage. Large Size \$2.75 each.

CHINESE PURPLE

WISTERIA (*W. Sinensis*)

One of the best of the Wisterias; rapid growing and elegant, attaining 15 to 20 feet in a season; flowers a pale-blue, borne in long pendulous clusters in May and June. Large plants \$1.75 each. These are grafted plants.

VEITCHI (Boston or Japan Ivy)

The now famous Japan or Boston Ivy used so extensively to cover brick or stone buildings. The foliage is dense, completely carpeting a surface, and the autumnal tints of green and red are unsurpassed for beauty. Large plants \$1.25 each.

HALL'S JAPAN HONEY-SUCKLE (*L. Halleana*)

A strong, vigorous vine with pure white flowers, changing to yellow; foliage remains green well into winter; very fragrant and covered with flowers almost the entire season; one of the best bloomers. Large plants \$1.25 each.

REFERENCES

We give the First Bank of Tigard, Tigard, Oregon, or the Citizens Bank of Sherwood, Ore., as our reference. Write for other references. Tualatin Valley Nurseries — headquarters for the Finest Trees grown.

PROSPECTIVE CUSTOMERS: We have received many fine testimonials on our trees. We had one fruit grower write us saying that he had never seen such fine trees as was received from the Tualatin Valley Nurseries. Another grower wrote us saying that, by planting Tualatin Valley Nurseries trees was a life-saver as they commenced bearing very young. Many other growers have written to us regarding our fine peach trees, saying they had made large profits the third year after the trees were planted. Tualatin Valley Nurseries trees always bear young. The same with the cherry trees; many growers have told us they have never seen cherry trees bear so quickly as the Tualatin Valley Nurseries trees.

Also, Tualatin Valley Nurseries trees have been real prize-takers. The fine large, long-stemmed Bartletts bringing higher prices at the canners than most of the other strains of Bartletts; the delicious D'Anjou and Bosc pears and the Tualatin Valley Nurseries grown apricots. Many growers have told us they are tops.

Also, the Tualatin Valley Nurseries grown apple trees have given better results on account of their superior quality. Tualatin Valley Nurseries grown nut trees and all other varieties you will find listed will take first place in the fruit growing industry.

Insist on planting the very best—Tualatin Valley Nurseries trees. Every tree replaced free of charge, that is not satisfactory on delivery. It is a 100% satisfaction proposition. Why not try us for real success?

Successful Planting, Pruning, Care

In presenting these instructions to our patrons, we would earnestly request that they give the most careful attention to the details. They have been compiled with a view of making them as simple as possible. Having fulfilled our part of the contract by delivering first-class stock in good condition, with full instructions how to care for it, the fault is not ours if any of our customers should lose a portion of their stock. Experience has taught us that purchasers frequently lose Nurery stock through neglect; and we have taken the precaution to send a copy of our Transplanting Directions to every customer, so that none may claim that they do not know how to plant and care for their stock.

We guarantee to deliver the stock in good condition, and could we plant and care for it for the first three months, would willingly insure the growth of every tree and shrub sent out. We seldom lose a plant, even during the summer for fall delivery, and the stock is out of the ground for many weeks. Anything that is cultivated in the earth cannot live without nourishment and care.

CARE OF STOCK

The bundles should be opened immediately, the roots dipped in water, then heeled in moist ground, so that the mellow earth will come in contact with the roots and thoroughly protect them from the air, having the earth tramped solid about them.

When ready to plant take up only a few at a time, puddle the roots, and do not allow them to lie exposed to the sun or air.

The ground should be carefully prepared by deep plowing and firming down with a disc and harrow.

PLANTING

The holes for planting must be large enough to receive the roots freely, without cramping or bending them from their natural position. All broken or mutilated portions of the roots must be cut off so as to leave the ends smooth and sound. All trees should be planted no deeper than they stood in the nursery row; pack the soil very firmly about the roots by tramping with the feet or post tamper, being careful not to bark or break the roots. Leave as a mulch. If the ground is very dry apply one to two pails of water before this soil mulch is in place, and after the water has soaked away it can then be placed over the moist soil. Never put manure so as to come in contact with the roots of any plant or tree.

PRUNING

Apple and Pear—Select from three to five of the branches to form the permanent head of the tree. These branches should be well distributed around the trunk, and at a safe distance apart up and down the trunk. If two branches come out, one exactly opposite the other, forming a crotch, a split may occur at this weak point in later life when the tree is full of fruit. Shorten these selected branches to about five buds, cutting the branches just above a bud that points outward. Remove all the other branches, leaving no stub longer than one-eighth to one-quarter inch. Also shorten back two-thirds the central

RIGHT WAY

WRONG WAY

leader of the tree, if one exists, else the tree assumes a too upright growth for best results in later life.

Peach—These should be planted immediately on delivery; or, if not prepared to do so, the roots should be buried in the ground. They will not stand exposure to the sun and air, and many are lost simply for the want of care. As soon as planted, cut back all side branches to within two or three inches of the main stem. Make this the invariable practice, and never deviate from it if you wish to save your trees. The growth will be much more rapid and vigorous in consequence of this pruning, and by strictly adhering to it, and by immediate planting or covering the roots in the soil, very few, if any, trees will be lost. Peaches like all other stock we deliver, will be in fine condition, having been carefully handled. Prune 1-year apple, pear, cherry, prune, apricot, plums same way as this peach. Most 1-year trees do not have branches—wherever you cut a 1-year tree it will form limbs and make branches.

Newly Set Peach Same Peach
Ready to Be Pruned
Pruned

Prune 1-year Apple, Pear, Cherry, Prune, Apricot, Plums same way as this Peach. Most 1-year trees do not have branches—wherever you cut a 1-year tree it will form limbs and make branches.

Tualatin Valley Nurseries 1 year Top with 3 year Root are the BEST. You can build a Perfect Tree.

If planting a few trees for home use, no need pruning quite as heavy as picture above.

TUALATIN VALLEY NURSERIES, ROUTE 3, SHERWOOD, OREGON

Grapes—These should be planted ten to twelve inches deep in holes large enough to admit roots without curling them, pressing soil solid about roots. Cut vines back to within three or four buds of the roots. Keep the ground clean by cultivating; if impossible to cultivate, mulch. Prune in February or early March, before there are any signs of new growth—hence the importance of annual and intelligent pruning.

Apples, Pears, Prunes, Plums, Apricots, etc.—Follow same pruning instructions as peaches.

FALL PLANTING

When set in autumn, a mound of earth must be raised about the trees. This is very essential, as it keeps them from being swayed by the winds or thrown out by the frost during the winter. It should be removed in the spring.

In sections where the winters are extremely severe, trees procured in the fall can be best cared for by covering the roots with earth during the winter and planting them in the spring.

To insure success, select a spot where no water will stand during the winter, having no grass near to invite mice. Dig a trench deep enough to admit one layer of roots, and sloping enough to permit the tree to lie at an angle of not more than 30 degrees with the ground. Having placed one end of the roots in this trench, cover them

with mellow earth extending well up on the tree and see that this is firmly packed. Then add another layers of trees, overlapping the first continuing as at first until they are all heeled in. As soon as this is done, cover the tops so with evergreen boughs that they will be thoroughly protected from winds.

SPRAYING

There are four distinct types of troubles to combat, i. e.: Chewing insects, sucking insects, scale insects and fungous diseases. Chewing insects are controlled with a stomach poison, some form of arsenic (lead arsenate), sucking insects (lice or aphids) by body contact poison (nicotine), or miscible oil (kerosene, emulsion), and fungous diseases by lime-sulphur solution or Bordeaux mixture. Be sure you know what you are spraying for, since arsenate of lead will not control lice or aphids, nor will nicotine or kerosene emulsion control apple worms, and neither of these will have any effect on apple scab or other fungous diseases. Lime-sulphur is used as a dormant spray for scale, insects and also for fungus. In spraying the apple, keep in mind the two main apple troubles, the codling moth and apple scab, and, in controlling these, most other troubles are immediately controlled. Lead arsenate and lime-sulphur or Bordeaux mixture are the sprays to use. For further information write your State Department.

SPECIAL NOTICE ON SPRAYING PEACH TREES—Be sure to follow very carefully the Spray program on peach trees. Our advice is, apply your first spray of 4-4-50 Bordeaux the latter part of October. The second spray of 4-4-50 Bordeaux applied the 15th of December. Be sure to use a spreader. Apply your third spray of Lime and Sulphur, 9 parts of water, 1 part liquid sulphur, applied the 1st of February. Be sure to follow these three sprays very carefully and see to it that it stays on. If you spray and the first rain washes it off, you have not done a very good job, and in that case we would suggest to spray again immediately. Do not leave your peach trees uncovered with spray during the winter months. A good spreader usually makes the spray material stick on, even though you have a lot of rain.

Tualatin Valley Nurseries Trees Grow Where Others Fail. Tualatin Valley Trees Have Been Shipped and Planted All Over the United States With Great Success. Why Not Give Them a Fair Trial. We Will Assure You of Results.

HOW TO REACH TUALATIN VALLEY NURSERIES - Read Carefully

Leaving Portland, go out 4th Street to Barbour Blvd., follow highway 99W to Tigard, go straight through Tigard toward 6 Corners. Note—Do not leave Highway 99W. We are located 1 mile past 6 Corners, right on the left-hand side of the highway. (Watch for our sign.) Stay on Highway 99W.

NOTE:

Leaving Portland — go South on 4th St. to Barbour Blvd. From Barbour Boulevard to our Nursery is 14 miles.

What Our Customers Say About Us - Let Us Prove It

"I am sending again for a small order of trees. I would like to praise you on your honesty and reliability of your nursery stock. Everything has, so far, proved to be just as you labeled it and has been just what I ordered."

Lebanon, Oregon.

"Mr. — whose address is — was here today and asked where they could order nursery stock from a reliable nursery. I recommended you folks and told them I could recommend you most highly as I have had dealings over a number of years with you and found you absolutely reliable at all times.

(signed) Roy W. Clark

Atascadero, Calif.

"The trees arrived in fine shape. Thank you for the "free" trees I felt like a child at Christmas." (after request for permission for use as testimonial, received following:)

"Yes, your Nursery may use any part or all of the contents of my card. It was honestly and sincerely written. The trees you sent (even tho we had ordered them rather late) started right in growing and out grew others we had paid more for. (signed)

Berenice Herz.

Vancouver, Wn., May, 1951

"Thank you very much for replacement. They were in very good condition and we are very grateful for your service."

"I want to compliment you on your efficient handling of even small orders. My business with you has been trivial, but your prompt acknowledgements and notices of shipment — and early arrival of bulbs has been most satisfactory."

Napa, Calif.

"I wish to thank you for the fine trees you sent me. I bought trees from five other nurseries in different parts of the country and will say that yours were tops. Large and healthy root system and sturdy trunks. The trees I planted last fall are starting to leaf out fine and quite a few of the peach trees had blooms on. I am more than satisfied with them and will gladly recommend your nursery stock to anyone whether for home or commercial planting. Also found your prices reasonable. You may use this letter if you wish. (signed) F. J. Maltos"

June 10, 1951

"Wish to inform you we received the nursery stock. It was in good condition and now everything is growing fine. The strawberries we ordered before are bearing now and look very healthy. We do thank you for your honesty in replacing our loss. From now on we will know where to get more when we are ready — ."

"Received my blueberries today and I want to tell you how pleased I am with them. They are double the size of some I paid over twice as much for. Also, I want to say the tulips I got last fall are all up and some have been in bloom for three weeks. I shall tell my friends about you."

Vancouver, Wn.

"It is indeed a pleasure to do business with you. I have never received such nice service before. You may put us down as a "number one" booster for your nursery stock — ."

Paramont, Calif.

"It is a pleasure in this day, where nearly everything is highly commercialized, to be able to bargain for and receive what is ordered. But when a person receives a product far superior to what is expected he naturally feels overjoyed with it.

I have no reason to soft-soap you about your trees. I have written you the truth as I see it. I feel that a testimonial or what ever it is called, is due you. I would naturally like to see you expand and do good for the reason that you are supplying the very top in fruit trees and improving orchards and are an asset to our west coast and the nation. You have permission to publish anything I have written.

Sincerely yours, (signed)

John L. Solly.

Eureka, Calif.

"My daughter is in the 4H Club and she won first prize at the county fair on her gladiolus the bulbs we bought from you."

(signed) Mrs. Tony Souza.

Belmont, Calif.

"Just a line to let you know the tree, grape vine and rose bush are doing fine. I am pleased with your stock — ."

Vancouver, B. C., Canada.

"I guess you can's beat TVN stock for sure results. So I am subscribing for another order. The Variety Peach is a beautiful big tree now and the Camellia, Almonds, Loganberry and others are all doing well. The Clapp's Favorite pear had lots of foliage and put up plenty of fruiting spurs this year so am very pleased with your fine plants." (signed) S. E. Ward

This is a view of young Peach Trees, only 2 months old growth, ready to sell by fall. These trees will be beautiful large 3 to 4 ft.; 4 to 6 ft.; and 4 to 7 ft. Select Stock by fall.

Tualatin Valley Nurseries Are Years Ahead In Growing Trees

G R A F T I N G W A X

Our Own Make Grafting Wax. Our Formula Is Best For Grafting.

1/2 lb. 75c

\$1.25 per lb.

5 lbs. at \$1.00 per lb.

Our Budding Crew in a Field of Seedling Peach Trees. They are all budded one year before sold. The reason our trees are better, is we use hardy seedling root stock.

SPRAYS FOR BETTER TREES, MORE BEAUTIFUL FLOWERS AND FINER VEGETABLES

MICRONIZED COPPER SPRAY—For Peach Leaf Curl, blight, etc. Ready to use—Simply mix with water. Safe. Effective. **1 lb. \$1.00**.

LIQUID LIME SULPHUR—Used for the control of San Jose Scale and Scab on apples. 1 gallon glass jugs **\$1.25 each**.

GARDUSTO—All-in-one Garden Dust or Spray. Represents a combination dust or spray for control of most of the insect pests and fungous diseases of the vegetable and flower garden. **1 lb. 85c ea.**

VICTORY GARDEN INSECTICIDE—A pyrethrum product which can be used as a spray or dust. Non-poisonous. Used with safety in the vegetable garden right up to the harvest time. Controls aphid, 12 spotted beetle, flea beetle, etc. **10 oz., 75c.**

ARSENIC OF LEAD—This is an exceptionally good spray for chewing insect and to be put on the trees before the Calyx closes. This spray should be continued during summer about every 30 days. You can add Black Leaf 40 for killing aphid also. Arsenic of Lead, 1 lb. can **\$1.00 each**.

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

SPRAY CALENDAR—WHEN TO SPRAY, WHAT TO USE

| Insect or Disease | Plant Attacked | What to Spray With | First Spraying |
|-------------------------------|---------------------------|--|--|
| Coddling Moth..... | Apple, Pear..... | Lead Arsenate or Calcium Arsenate..... | Just before Calyx closes; Repeat 15 days and 30 days later; keep developing fruit covered. |
| San Jose Scale..... | Apple, Pear..... | Lime Sulphur Solution..... | Dormant, as buds are swelling. |
| Oyster Shell Bark Louse..... | Apples..... | "Dormo," oil emulsion..... | Dormant, before buds swell. |
| Peach Moth or Twig Borer..... | Peaches..... | Lime Sulphur Solution..... | When blossoms show pink. |
| Wooly Aphid..... | Apples..... | "Sumero," oil emulsion, "Aphido" or Nicotinum..... | When insects first appear. |
| Anthonomus..... | Apples and plants..... | "Tri-Ogen," "Aphido" or Nicotinum..... | When insects first appear. |
| Cabbage Worm..... | Cabbage..... | "Gardusto" or Calcium Arsenate..... | When insects first appear. |
| Cabbage Aphid..... | Cabbage..... | "Gardusto" or Nicotine Dust..... | When insects first appear. |
| Sing..... | Cherry, Pears, Roses..... | "Tri-Ogen" or "Gardusto"..... | When insects first appear. |
| Thrips..... | Gladioli, Roses..... | Roteno Spray or Red Spider Dust..... | When insects become cottony (May). |
| Cotton Scale..... | Pear, Currant..... | Light "Sumero", "Aphido"..... | When blossoms show pink; Calyx; 1 st and 30 days later. |
| Scab..... | Apple, Pear..... | Lime Sulphur Solution or Bordeaux..... | Most any time of year when dry. |
| Peach Borer..... | Peach and Prunes..... | Miscible Ethylene Dechloride Liquid..... | Early spring, dormant. |
| Blackspot..... | Roses..... | "Tri-Ogen"..... | Immediately after harvest. |
| Leaf Curl..... | Peach..... | "Bordo," winter strength..... | Just as buds start. |
| Peach Blight..... | Roses..... | "Bordo" or Wettable Sulphur..... | Just as buds start. |
| Mildew..... | (Gooseberry.....) | "Tri-Ogen"..... | Potassium Sulphide, 1 oz. to 2 gal. water..... |

Peach trees should be sprayed with 4-4-50 Bordeaux after harvest, again in December—use 5-5-50 Bordo. Always use a good spreader. Apply a lime and sulphur spray in early spring, the last of February or first of March. This will give perfect curl leaf and blight control.

DISTANCE RECOMMENDED FOR PLANTING

| | 2 ¹ / ₂ to 40 ft. each way | 2 ¹ / ₂ to 35 ft. each way | 20 to 35 ft. each way | 15 ft. each way | 18 to 24 ft. each way | 15 to 20 ft. each way | 25 to 40 ft. each way | 6 ft. x 4 ft. | 6 ft. x 3 ft. |
|------------------------|--|--|-----------------------|-----------------|-----------------------|-----------------------|-----------------------|---------------|---------------|
| Apples (Standard)..... | | | | | | | | | |
| Pears (Standard)..... | | | | | | | | | |
| Quince..... | | | | | | | | | |
| Peaches..... | | | | | | | | | |
| Plums..... | | | | | | | | | |
| Cherries..... | | | | | | | | | |
| Blackberries..... | | | | | | | | | |
| Raspberries..... | | | | | | | | | |

NUMBER OF PLANTS PER ACRE AT VARIOUS DISTANCES In Planting Trees the Greater Distance Should Be Given in the Richer Soils

| Distance Apart | Triangular Method | Square Method | Triangular Method |
|-----------------------------|-------------------|---------------|-----------------------------|
| 1 foot apart each way..... | 43,560 | 50,300 | 15 feet apart each way..... |
| 2 feet apart each way..... | 10,890 | 12,575 | 16 feet apart each way..... |
| 4 feet apart each way..... | 2,722 | 3,143 | 20 feet apart each way..... |
| 6 feet apart each way..... | 1,210 | 1,397 | 25 feet apart each way..... |
| 9 feet apart each way..... | 537 | 620 | 30 feet apart each way..... |
| 10 feet apart each way..... | 435 | 502 | 40 feet apart each way..... |

SQUARE METHOD—Multiply the distance in feet between the rows by the distance in feet in an acre (43,560) gives the number of plants or trees to an acre.

TRIANGULAR METHOD—Divide the number required to the acre square method by the decimal .866. The result will be number of plants required to the acre by triangular planting.
